Module 1 People and Personalities. Lifestyles

Part I TEST Частина «Читання» Reading

Task 1

Read the text below. Match choices (A - H) to (1-5). There are three choices you do not need to use. Write your answers on the separate answer sheet.

You Are What You Think You Are

It is very common for teenagers to have a negative image of their own bodies. They insist they are hopelessly ugly, no matter how much their parents and friends tell them otherwise! Magazine problem pages and Internet blogs are full of agonized accounts. The young people who write them are convinced they are unattractive and therefore unloved and rejected by others.

2.____

Why do teenagers see themselves in an unflattering way? The fact is, puberty has a lot to do with it. During your early teens, the body is preparing itself for adulthood. New chemicals are moving around the body as it adjusts to adult hormone levels. The body alters its shape, sometimes resulting in puppy fat. Skin problems such as acne are also common. Teens are affected psychologically too. They become confused and anxious about their changing appearance. This in turn can lead to feelings of insecurity and low self-esteem.

3.

Nor is the situation helped by the media. Young people are bombarded with images of the ideal body. Top fashion models in glossy magazines are all far taller and skinnier than the average woman. They have their hair and make-up done professionally. After a fashion shoot, magazine editors have the photographs airbrushed before they are published to give the models a flawless complexion. Male actors in epic films flex beautifully toned rippling muscles. But more than likely, they have had them digitally enhanced, or "photoshopped", as they call it in the trade. Not to mention the fact that many celebrities choose to have cosmetic surgery done to enhance their appearance. None of this reflects a realistic body image, so it's no wonder adolescents are made to feel inadequate and unsure of themselves.

4. _____

The good news is that, however dissatisfied you are with your looks, the chances are it's only temporary! Those extra kilos and that spotty skin usually disappear by themselves in time. While your body is sorting itself out and "settling into" its final form, you need to ride out the change! Resist the temptation to compare yourself with your peers. This is easier said than done when you are the tallest girl in your class or the only boy who has

started growing a beard. You tend to feel the odd one out and may even get teased or bullied. Just remember that although teens' bodies change at different speeds, everyone ends up at more or less the same place in the end!

5.

It's important to realise what things you can change about yourself and what things you can't. Correct diet and exercise can do wonders for your appearance. Having your hair restyled, your nails manicured or your teeth whitened will also help boost your self-confidence. The things you can't alter, like your height or your shoe size, should be seen as strengths and not weaknesses. They are, after all, the features that make you a unique individual!

(Adapted from: Virginia Evans, Jenny Dooley (Eds.). (2016). Prime Time 4. Student's Book. Express Publishing. P.108)

- A Physical traits can reveal your personality
- B Many teenagers worry about their appearance
- C Adolescence is the time that influences your mental well-being
- D People who post selfies are more open to new experiences
- E Teens develop at a different rate
- F Fashion models have their appearance improved artificially
- G An increasing number of teens change their image through plastic surgery
- H Social media use has no impact on self-esteem, body image and body dissatisfaction

Task 2

Read the text below. For questions (6-10) choose the correct answer (A, B, C or D). Write your answers on the separate answer sheet.

Why Fathers Want to Look after the Baby

One of the most extensive surveys of fathers has now shown that, far from the stereotype, most men would like to share childcare duties with their partners or wives.

The survey made by the Equal Opportunities Commission shows a modern type of father: the New Dad. He takes part in day-to-day childcare and does not mind helping with the vacuuming and washing-up — if only when his partner asks him to. The EOC interviewed sixty-four fathers and their partners about their home and work life. Most fathers agreed that it was important to 'be there' for their children for key events such as school sports day, their first appearance in the school play and for at least one meal a day. Many agreed that parenting classes would be a good way to give them more confidence around the home.

Based on the survey results, four types of fathers were defined, from the traditional type of dad to the perfect New Dad, who is as much involved in taking care of the children as the mother. The survey found that the majority of men were somewhere between these two types.

In the first category comes Enforcer Dad, the old-fashioned disciplinarian who does not see himself as involved in the day-to-day care of his children. He sees his responsibilities as setting clear limits for them and being a role model. Most fathers do not see this as their only role.

The two biggest categories are Entertainer Dad and Useful Dad. Entertainer Dad is at his best keeping his children laughing while his partner gets on with household chores and arranging the children's school and extra activities. Useful Dad is willing to help out around the house, even though he expects the mother to be the "team leader" in all things domestic.

Finally, and probably every woman's dream, is Fully Involved Dad. He is equally engaged in running the home and the family, and sees the role of the father and the mother as practically identical. Fully Involved Dads adjust their work arrangements to their partners' professional duties. "I do have definite childcare commitments,"

said one father in this category. "There are certain times or occasions where it is non-negotiable and 1 just leave the office on time."

Julie Melior, chairwoman of the EOC, said that fathers were still not given enough flexibility at work and mothers would feel fully supported only if employers treated (and paid) both sexes equally. "Mums and dads should be able to choose how they want to share the responsibilities of bringing up children and working outside the home," she said. "But until we have equal pay, decent childcare and more opportunities to work flexible hours, many fathers will continue to find it hard to be there for their children and many women will continue to be disadvantaged at work. This is not necessarily the best solution for parents, children or employers. Equality at work or home depends on both mums' and dads' family responsibilities being acknowledged," Melior said.

6. Which of the following topics does the headline of the article reflect?

- A Fathers can choose how they want to share the responsibilities of bringing up children
- B Fathers should be encouraged to participate in childcare more actively
- C Fathers are ready to participate in taking care of children
- D Working women want their partners to take over some childcare responsibilities

7. Why would many fathers like to attend parenting classes?

- A So they can be more confident in dealing with domestic issues
- B So they can learn how to do day-to-day childcare
- C Because they think it's important to be involved in the day-to-day care of children
- D Because they want to attend important school events

8. How do Enforcer Dads view their role in childcare?

- A They don't see childcare as their responsibility
- B They teach their children discipline by setting an example for them
- C They keep children amused while their partner gets on with housework
- D It's important for them to be involved in the day-to-day care of their children

9. How do Fully Involved Dads find time to share childcare responsibilities with their partners?

- A They fit their work commitments to their partner's arrangements
- B They often leave the office early
- C They run the home and the family, so their partners can focus on their professional duties
- D They think it's their partner's responsibility to negotiate flexibility at their workplace

10. What does Julie Mellor think employers should do?

- A They should give women more support so they can take on more of the childcare responsibilities at home
- B They should allow parents to work from home so they can look after their children
- C They should pay women more because they are often disadvantaged in the workplace
- D Employers should provide both parents with equal pay and flexible working hours

Task 3

Read the texts below. Match choices (A-H) to (11-16). There are two choices you do not need to use. Write your answers on the separate answer sheet.

Morning Habits of Celebrities You Can Adopt to Set up Each Day for a Win 11. Steve Jobs

In his speech to a graduating class at Stanford, Jobs said that each morning he looked in the mirror and asked himself the same question: "If today was the last day of my life, would I want to do what I'm doing

today?" Whenever his answer was "no" for too many days in a row, he was sure that he needed to change something in his life. This kind of reevaluation of his work and desires every single day helped him pursue his dreams without forgetting about his true self.

12. Mark Zuckerberg

Of course, having lots of choices may seem awesome and even luxurious for some of us. But when you're in a hurry in the morning, wasting those precious minutes on deciding what to wear or to eat may actually turn your day into a complete disaster. That's why many wealthy and successful people have voluntarily chosen to eliminate their decisions throughout the day. One of the greatest examples of this is seen by Mark Zuckerberg who admits that he has about 20 identical grey T-shirts in his closet. This lack of choice helps him avoid decision fatigue and focus his attention on business.

13. Julianne Hough

Julianne Hough prefers to start her day on a positive note by performing her own morning gratitude ritual. Right after waking up at 6:30 AM, she sits up in her bed and thinks of 5 things she's grateful for that either already happened to her or that she wants to do that day. Julianne also sets some small spiritual goals for the following 24 hours. This can be something like making 10 people smile throughout the day, for example. Only after this does she get out of bed, brush her teeth, and proceed with her other morning routines.

14. Richard Branson

It turns out that Branson is not the only early bird in his family. No matter what he's up to later, Richard wakes up at around 5 AM, works out, and eats his breakfast. However, the most important part of his morning is spending time with his family. Branson says that some quality family time puts him in a great frame of mind before getting down to business. According to some studies, it also reduces stress, improves your health, and extends the length of your life.

15. Oprah Winfrey

The benefits of meditation are well-known to many – it helps reduce stress, improve productivity, boost creativity, and maintain general well-being. That's why Oprah Winfrey usually includes meditation in her daily routine. Oprah starts each morning with 20 minutes of sitting meditation, not skipping holidays and weekends. She says that sitting in stillness fills her with hope, a sense of contentment, and deep joy.

16. Tim Ferriss

Tim Ferriss knows all about success, simply because he has interviewed thousands of great leaders from all walks of life. "Win the morning, win the day," is Tim's motto expressed in one of his books.

Ferriss chooses to start his days by clearing both his room and his mind, and that's why he does the easiest but most annoying task first: he makes his bed. This simple action gives him a feeling of pride and accomplishment. Having done this, he can be sure that there is at least one thing in his life that is absolutely under his control, and all the rest is not worth worrying about.

W	hich	person	

- A gets up early and takes a steam shower for 20 minutes each morning?
- B expresses appreciation on a regular basis while staying in bed?

- C does ordinary things to succeed in life?
- D gets rid of options?
- E works out with his/her friends?
- F finds inspiration in close relations?
- G reminds himself/herself of his/her dreams?
- H spends not less than a quarter of an hour in quiet thought in the morning?

Task 4

Read the text below. Choose from (A - H) the one which best fits each space (17-22). There are two choices you do not need to use. Write your answers on the separate answer sheet.

Ageing Like a Queen: the Secrets to Elizabeth's Longevity

Growing older, whilst becoming a Queen, are privileges denied to most of us. They require strength, self-control, resilience and, of course, great health. Her Majesty Queen Elizabeth II, the United Kingdom's longest-reigning monarch and the oldest head of state in the world, is succeeding at both.

But how can she remain amazingly comfortable in her own skin after all these decades?

She probably has very good genes to count on, but being in such a great form, at 96 years old,

(17) ______, is also a matter of having a healthy lifestyle and great mental well-being. What's her secret?

A surprisingly simple approach to nutrition, sensible exercise, a great sleep routine and, of course, a cup of Earl-Grey tea every morning (18)

The Queen has never let life's drama get her down, regardless of the royal scandals (19) ______. Being resilient is probably one of her most popular traits. She is well known for staying on top of her work, spending leisure time, navigating both familiar and professional relationships, and managing to do it all while ageing gracefully.

The Queen knows the importance of continuing engagement in activities and relationships. As a result, she's never off duty, keeping her brain active, through work or educational projects. She sees public and voluntary service (20) ______.

(21) ______, the Queen definitely finds regular daytime breaks to rest and recharge. Her Majesty loves spending time outdoors walking her dogs around the grounds of Windsor Castle or Buckingham Palace and has also long been fond of horseback riding for most of her life. Whether spending time in nature or enjoying quiet time alone, it's no doubt she has contributed to her strong immune system.

The Queen's lifespan could be also a direct result of her excellent sleep routine. She typically goes to bed at about 11 pm to guarantee a solid 8 hours of rest — an absolute must for the hardworking Elizabeth — and arises every morning (22) ______.

What an amazing example Her Majesty is to all of us, with so many positive lessons from which we all could learn. Successful ageing is measured in both quantity of years and quality of life – not simply breathing but retaining vitality and enthusiasm, enough to make life well worth living.

Task 1

3.

Read the text below. Match choices (A-H) to (1-5). There are three choices you do not need to use. Write your answers on the separate answer sheet.

The History of Football

1. _____ The first known examples of a team game involving a ball, which was made out of a rock, occurred in old Mesoamerican cultures over 3,000 years ago. According to the sources, the ball would symbolise the sun and the captain of the losing team would be sacrificed to the gods. The first known ball game which also involved kicking took place in China in the 3rd and 2nd century BC under the name Cuju. Cuju was played with a round ball on an area of a square. It later spread to Japan and was practised under ceremonial forms.

The game was developed in England in the 12th century. That time, games that resembled football were played on meadows and roads in England. Besides kicks, the game involved also punches of the ball with the fist. It took, however, long time until the features of today's football had been taken into practice. For a long time, there was no clear distinction between football and rugby. There were also many variations concerning the size of the ball, the number of players and the length of a match. An attempt to create proper rules for the game was done at a meeting in Cambridge in 1848, but a final solution to all questions of rules was not achieved. Another important event in the history of football came about in 1863 in London when the first Football Association was formed in England. It was decided that carrying the ball with the hands wasn't allowed. A consequence of the London meeting was that the game was divided into two codes: association football and rugby.

Football Association Challenge Cup (FA Cup) became the first important competition when it was run in 1871. The following year a match between two national teams was played for the first time. The match that involved England and Scotland ended 0–0 and was followed by 4,000 people at Hamilton Crescent. Twelve years later, in 1883, the first international tournament took place and included four national teams: England, Ireland, Scotland and Wales. In 1908 would football for the first time be included as an official sport in the Olympic Games. Until the first FIFA World Cup was played in 1930, the Olympic Games football tournament would rank as the most prestigious on a national level.

No other sport event besides the Summer Olympic Games can today measure itself with the FIFA World Cup. The first edition of the FIFA World Cup was played in 1930 in Uruguay and has since then returned every fourth year (with two exceptions due to the Second World War). In 1991 the first World Cup for women was held in China and has since then also returned every fourth year. Today the biggest global tournament for clubs is the Champions League (played since 1992), the former European Cup (1955–1991).

5.

In the late 19th century, only a few national football teams existed; England and Scotland had the first active teams that played games against each other in the 1870s. Today there are 211 national associations included in the Fédération Internationale de Football Association (FIFA), the world governing body of the sport. The number of nations participating in the World Cup qualifiers increased from 32 in 1934 to over 200 in 2014. The world regions have been divided into six confederations.

Task 2

Read the text below. For questions (6-10) choose the correct answer (A, B, C or D). Write your answers on the separate answer sheet.

The Olympic Games

For the ancient Greeks, the Olympic games existed since mythical times, but no definitive time of their inauguration can be identified with any certainty. The first Olympiad was held in 776 BC, and this is the year that provides the first accurate chronology of Greek history. The athletic games were held every four years during the second (or possibly the first) full moon in August, and the celebrations lasted five days.

Only free male Greeks were eligible to participate in the games, and they came from all corners of the Mediterranean, including colonies from Magna Grecia and the Pontus. Slaves and women were banned from the sanctuary under penalty of death. Women however were allowed to sponsor events, teams and athletes. In addition, a competition with exclusive events for boys were introduced in 632.

During the games warring Greeks had to cease all hostilities because it was mandatory to participate in peaceful assembly. To this end, officials from Olympia travelled ahead of time throughout Greece to announce the assembly and to proclaim the ceasing of all hostilities (for up to three months) so all participants could find safe passage to the sanctuary.

More importantly, the games reflected the Greek's ideals: a free individual who aspires to achieve excellence through a contest governed by just laws. Just like the games, Greeks in their everyday lives competed intensely with each other in the political realm, in the economy, and in the battlefield. They competed by placing enormous importance on the value of the individual, and by respecting the rule of law that was above all.

Initially, the games were a local affair and the only event was the sprinting race, but in the 8th and 7th centuries BC wrestling, boxing, and equestrian events were added, as well as the pentathlon (an event that combined running, long jump, discus and javelin throwing, and wrestling), and the pankration which was a vicious form of boxing with little to no rules. The Olympics in ancient Greece also included poetry and writing competition, and it provided a peaceful ground where Greeks discussed and forged agreements on military, commercial, and political matters.

Winning an Olympic event bestowed fame and great honour to an athlete. The winners were announced by a herald following each event, and they were rewarded with a wreath. Tradition holds that cities will welcome back their Olympic winners by symbolically destroying part of their defensive walls.

The modern Olympic revival began in 1896. Since then, the Olympics have occurred every four years in different countries (interrupted only by the two World Wars), and they have become one of the largest sports entertainment events in the world, drawing billions of dollars in revenues, and enjoying wide participation by the vast majority of nations. As a tribute to their ancient roots, before each Olympic event the Olympic flame is initiated in ancient Olympia, in the temple of Hera. In an imaginative choreography that depicts the ancient Vestal Virgins, the Olympic torch is inflamed by sun rays concentrated by a concave mirror on its tip. From Olympia then this flame travels in a festive race-to the country which holds the games. The flame burns for the duration of the Olympics, and its extinguishing marks their closing.

- 6. Why was it necessary to proclaim the ceasing of hostilities during the early Olympic games in Greece?
- A The merchants could reach better contracts.
- **B** The athletes should have the possibility to get to Olympia without obstacles.
- C The second full moon in August was the best time for agriculture.
- **D** It was the only time when slaves were allowed to participate in the games.

7. Which of the following is NOT mentioned in the text?

- A Greeks shared the same values in sports and in political competitions.
- B Just laws were very important for the contestants
- C The concept of rule of law has become obsolete for the Greeks after the first games.
- D The concept of a free individual was one of the ideals of the Greeks.

8. What kind of sports was initially included into the games?

- A Pankration
- B Wrestling
- C Pentathlon
- **D** Running

9. How did the home city greet the winners of the games?

- A Ruining the walls
- B Awarding a wrath
- C Constructing a monument
- D Announcing the winner's name

10. Which of the following is true?

- A The Olympic flame starts its journey in the country which holds the games.
- B Sun rays are used to light the Olympic fire.
- C The extinguishing of the fire marks the beginning of the games.
- D The Olympic flame is lit in the temple of Zeus.

Sport Courses at the University of Stirling

11. Our Sport Business Management course equips you to meet the industry's need for technically competent, customer-oriented and commercially-minded practitioners who can apply their knowledge across

the domestic and international sports markets. You'll graduate with core management skills and an understanding of key contemporary issues in sport business – from marketing to sponsorship, event management and corporate social responsibility. There are three key components to the course: sport management and technical expertise; business enterprise; and market awareness. Everything you study will be rooted in the needs of industry, and you'll be taught in realistic, sports-based working environments.

- 12. Our Sport Development and Coaching course will teach you about: sports in society, the science of sports performance, the nature of sports organisations, theory and practice of sport coaching and sport development. On completion of the course, you will be an independent learner capable of critical analysis and competent in communicating through a range of mediums, to a range of audiences. Furthermore, you will have laid the foundations for being an independent researcher preparing you for further study at MSc or PhD/ Professional Doctorate level.
- 13. Become a Sport and Exercise scientist with our BSc Sport and Exercise Science degree and you can transform lives and sporting careers. You'll learn from our experts in sport and exercise physiology, nutrition, genetics, medicine, health and physical activity. Our research and performance analysis laboratories enable you to develop your scientific and practical skills in a world-class learning environment. Our course will prepare you for the many career opportunities available in Sport and Exercise Science. Our BSc Sport and Exercise Science degree is delivered jointly by the Faculty of Health Sciences and Sport and the Faculty of Natural Sciences, combining a wide range of expertise to ensure an unrivalled student experience.
- 14. Sport Nutrition is an increasingly vital part of elite sports and there has never been a better time to specialise, as recreational competitive sports and elite performance sports grow increasingly popular in the UK. The University of Stirling is one of only six universities worldwide approved to provide this Master's conversion course in sports nutrition. This course focuses on the science behind sports nutrition and is designed specifically for students who already have an International Olympic Committee (IOC) Diploma in sports nutrition and want to further their knowledge.
- 15. Sport Performance Coaching is the first course of its kind in Scotland. This innovative online Master's course gives experienced coaches the chance to improve their coaching knowledge and skills through cutting-edge best practice and research. The course is also suitable for coach developers who are seeking to enhance their work with coaches. This MSc Sport Performance Coaching degree will develop your critical analysis skills, improve your problem-solving abilities and teach you innovative solutions to coaching problems. You'll examine modern best practice in coaching from case studies, peers and leading coaches. Throughout the course, you'll examine and improve your understanding and practice of coaching, develop smart strategies and boost performance.
- 16. Sport degrees combined with other subjects. Interested in the management and delivery of sport? Wonder how psychology enhances sports performance? Considered the local and global importance and impact of sport? If you're thinking about a career in sports, a tailored Sports degree from Scotland's University for Sporting Excellence will help you be the difference. You can choose from modules exploring: Sports policy and management; Physical activity and health; Sports development and coaching; Sport, culture and society. Snow Sports to Try instead of Skiing or Snowboarding

Dog Sledding
Dog sledding is a fantastic way of seeing the gorgeous landscapes around you on a personal tour across
snow and ice. Sliding along in a sleigh is a dreamlike process (17) nature and all the wonders
it has to offer up close and personal.
Snowshoeing
Snowshoeing is the fasted growing winter sport in the world, primarily because it is simple
(18) and inexpensive (compared to other snow sports). There are many levels of snowshoeing,
whether you want to hike for pleasure, trek through the backcountry, or competitively race. Snowshoeing is a
fantastic alternative for skiing.
Ice Climbing
Ice climbing is pretty much what it says on the tin - climbing ice. Ice climbing is very similar to rock
climbing and uses ropes and crampons to ascend beautiful icefalls, frozen waterfalls, cliffs and frozen rock
faces. In most resorts, you can take guided climbing lessons, which everyone can do (19) of
fitness.
Ski Biking
This is an awesome sport to try if you're a skier or snowboarder and fancy trying your hand at something
a little different. It's similar to mountain biking, except on snow, with mini-skis instead of wheels, and you
break and slow down by digging your feet into the snow! When on the nursery slopes, ski biking is really easy,
it only (20) when on steeper routes.
Mountaineering
Mountaineering (otherwise known as alpinism) includes a whole host of activities, including climbing,
trekking, scrambling, and even crossing glaciers. Each resort (21)terrain ready to be explored
and discovered, just make sure you do your research before setting out. You can head out with someone
experienced, or join a local tour group, either way, don't go out alone if you're a novice mountaineer.
Ski Touring
Ski touring is similar to backcountry skiing and is normally done off-piste and away from ski resorts. It
has links to hiking and wilderness backpacking and often lasts more than one day. Ski touring involves sliding
up a mountain wearing skins over your skis. When you reach the top, you can enjoy a brief moment to take in
the beauty of the world, and then have an awesome off-piste adventure skiing down again. If you've never done
ski touring before, make sure (22) as it's important to have good navigation skills, an awareness
of the risks of the mountain, and you must be able to assess the snow conditions to reduce the risk of avalanches.

Module 3 Health & Medicine

Part I TEST Частина «Читання» Reading

Task 1

Read the text below. Match choices (A - H) to (1-5). There are three choices you do not need to use. Write your answers on the separate answer sheet.

Healthy Lifestyle Benefits: Tips for Living Your Strongest, Healthiest Life Yet

Ask 50 people to define what a "healthy lifestyle" is, and you'll likely get 50 different answers. That's because there's no one way to be healthy. A healthy lifestyle simply means doing things that make you happy and feel good. For one person, that may mean walking a mile five times a week, eating fast food once a week, and spending virtual or in-person time with loved ones every other day. For someone else, a healthy lifestyle may be training and running two marathons a year, following a keto diet, and never having a sip of alcohol.

2.

Healthy habits can reduce the risk of various diseases, including those that may run in your family. For example, in a recent study, adults who followed a standard American diet (rich in fruits and vegetables) for 8 weeks had a reduced risk of cardiovascular disease.

In another study, researchers found that every 66-gram increase in daily fruit and vegetable intake was associated with a 25 percent lower risk of developing type 2 diabetes. Swapping out some refined grains for whole grains also reduces the risk of disease.

It's always smart to see your primary care physician for an annual physical exam. This is especially true seeing how some health conditions, such as high blood pressure, are "silent." This means they don't have any symptoms, so unless you are checked, you usually don't know you have the condition. However, the healthier you are, the less likely you will have to see a doctor. This could save money by reducing co-pays, the need for prescriptions, and other treatments.

Basic healthy habits are connected with living a longer life. If, at age 50, you've never smoked, maintain a healthy weight, are regularly active, follow a healthy diet, and keep alcohol to a moderate consumption, you could live up to 14 years longer. Making even a few of these changes could lengthen your lifespan.

Ultra-processed foods are those that contain refined grains and additives to change the texture, taste, or colour. Some examples of these foods are cheese puffs, packaged dessert cakes, chicken nuggets, and sweetened breakfast cereals. More than 70 percent of foods in U. S. supermarkets are ultra-processed.

5.____

The making of ultra-processed foods contributes to greenhouse gas emissions, water scarcity, decreased biodiversity, plastic waste, and deforestation. But it's not only about what you eat more or less of. Replacing short car rides with biking can also cut back on the amount of carbon dioxide released into the atmosphere.

Your journey toward a healthier lifestyle starts with small changes that you feel confident you can achieve.

Task 2

Read the text below. For questions (6–10) choose the correct answer (A, B, C or D). Write your answers on the separate answer sheet.

I remember going to the British Museum one day to read up the treatment for some slight ailment of which I had a touch – hay fever. I got the book, and read all I came to read; and then, in an unthinking moment, I idly turned the leaves, and began to indolently study diseases, generally. I forget which was the first distemper I plunged into – some fearful, devastating disorder – and, before I had glanced half down the list of "premonitory symptoms," I realised that I had fairly got it.

I sat for a while, frozen with horror; and then, in despair, I again turned over the pages. I came to typhoid fever – read the symptoms – discovered that I had typhoid fever, must have had it for months without knowing it – wondered what else I had got; turned up St. Vitus's Dance – found, as I expected, that I had that too, – began to get interested in my case, and determined to sift it to the bottom, and so started alphabetically – read up ague, and learnt that I was sickening for it, and that the acute stage would commence in about another fortnight. Bright's disease, I was relieved to find, I had only in a modified form, and, so far as that was concerned, I might live for years. Cholera I had, with severe complications; and diphtheria I seemed to have been born with. I plodded conscientiously through the twenty-six letters, and the only illness I could conclude I had not got was housemaid's knee.

I felt rather hurt about this at first; it seemed offending. Why hadn't I got housemaid's knee? After a while, however, less strong feelings prevailed. I reflected that I had every other known malady in the pharmacology, and I grew less selfish, and determined to do without housemaid's knee. Gout, in its most dangerous stage, it would appear, had seized me without my being aware of it; and zymosis I had evidently been suffering from boyhood. There were no more diseases after zymosis, so I concluded there was nothing else the matter with me.

I sat and pondered. I thought what an interesting case I must be from a medical point of view, what an acquisition I should be to a class! Students would have no need to "walk the hospitals," if they had me. I was a hospital in myself. All they need do would be to walk round me, and, after that, take their diploma.

I went to my medical man. He is an old chum of mine, and feels my pulse, and looks at my tongue, and talks about the weather, all for nothing, when I fancy, I'm ill; so I thought I would do him a good turn by going

to him now. "What a doctor wants," I said, "is practice. He shall have me. He will get more practice out of me than out of seventeen hundreds of your ordinary, commonplace patients, with only one or two diseases each."

- A He could be a good student of medicine
- B Students would take him to hospital
- C He could award diplomas to students
- D Students could learn medicine studying him

Task 3

Read the texts below. Match choices (A - H) to (11-16). There are two choices you do not need to use. Write your answers on the separate answer sheet.

Habits of Super-Healthy People

11. It's important for a bunch of reasons. It jump-starts your metabolism and stops you from overeating later. Plus, studies show that adults who have it do better at work, and kids who are served it score higher on tests. If a big plateful first thing isn't for you, keep it light with a granola bar or a piece of fruit. Just don't skip it.

- 12. Don't just grab another cup of coffee get up and move. Do some deep lunges or stretches. It's great for your body and mind. Just 30 minutes of walking five times a week may help keep the blues at bay. And if you can't do those minutes all at once, short bursts help, too.
- 13. Checking your email and social media a lot? Sure, your friends' and family's latest updates are just a click away, but do you really need to see pictures of your cousin's latest meal? Let it wait until morning. Set a time to log off and put the phone down. When you cut back on screen time, it frees you to do other things. Take a walk, read a book, or help your cousin chop veggies for their next great dinner.
- 14. Acquiring additional skills helps keep your brain healthy. Sign up for a dance class or a creative writing workshop. Better yet, master a new language. The mental work it takes can slow the signs of ageing and may even delay the effects of Alzheimer's disease.
- 15. If you light up, quit. It's a big move toward better health. Your body repairs itself quickly. As soon as 20 minutes after your last cigarette, your heart rate and blood pressure drop. Why wait? Kick the habit, today. Your doctor will be happy to help you get started.
- 16. Strength training helps your body trade fat for muscle mass. That means you'll burn more calories even when you're being a couch potato. But these workouts can also help you slim down, strengthen your heart, and build up your bones. Do strength-training exercises like push-ups, lunges, and weight lifting at least twice a week.

Basic First Aid Knowledge Is Essential
Most people are (23) to take first aid training programmes because they think that the chances
of emergencies happening are highly unlikely. However, mishaps, accidents, and certain contingencies can
occur anytime. These scenarios may cause serious physical injury when there's nobody around to perform
immediate first-aid treatment.
First aid (24) to the immediate care you should provide when a person is injured, poisoned,
or sick. The goal is to ease the pain or reduce its potential from worsening before they receive full treatment.
When (25) first aid, it's crucial to keep the three Ps in mind – preserve life, prevent
deterioration, and promote recovery.
If you're in the same place where the accident occurred, step up and provide immediate care. If the person
is (26), you ought to initially introduce yourself as the first aid responder and ask permission
before you can touch and help them. However, if the person is dazed or has (27), you can assume
that they're willing to receive aid.

World's Air Pollution
Air pollution refers to the release of pollutants into the air – pollutants which are detrimental to human health and the planet as a whole. It means any physical, chemical or biological change in the air. It is the contamination of air by harmful gases, dust and smoke which affects plants, animals and humans drastically.
2
Like people, animals, and plants, entire ecosystems can suffer from air pollution. Air pollution particles eventually fall back to Earth. Air pollution can directly contaminate the surface of bodies of water and soil. This can kill crops or reduce their yield. It can kill young trees and other plants. Sulphur dioxide and nitrogen oxide particles in the air can create acid rain when they mix with water and oxygen in the atmosphere. 3
Pollution enters the Earth's atmosphere in many different ways. Most air pollution is created by people, taking the form of emissions from factories, cars, planes, or aerosol cans. Second-hand cigarette smoke is also considered air pollution. These man-made sources of pollution are called anthropogenic sources. Some types of air pollution, such as smoke from wildfires or ash from volcanoes, occur naturally. These are called natural sources. 4
Anybody can take steps to reduce air pollution. Millions of people every day make simple changes in their lives to do this. Taking public transportation instead of driving a car, or riding a bike instead of traveling in carbon dioxide-emitting vehicles are a couple of ways to reduce air pollution. Avoiding aerosol cans, recycling yard trimmings instead of burning them, and not smoking cigarettes are others. 5.
Vivote Protectal is the agreement adopted in 1007 that aimed to reduce carbon disvide emissions and the

presence of greenhouse gases in the world. Most developed nations have adopted their laws to regulate emissions and reduce air pollution. In the United States, debate is under way about a system called cap and trade to limit emissions. This system would cap, or place a limit, on the amount of pollution a company is

allowed. Companies that exceeded their cap would have to pay. Companies that polluted less than their cap could trade or sell their remaining pollution allowance to other companies.

Wordsworth's Lake District

Two hundred years ago the English poet William Wordsworth wrote a poem that expresses a basic spirit of early English Romanticism. It was Thursday, 15 April 1802. William and Dorothy Wordsworth, the poet's devoted, journal-writing sister, were walking home to Dove Cottage in the Lake District. The wind was fierce, but the Wordsworth siblings were used to striding long distances in foul weather. They were in the woods close to the water side when they first clapped eyes on a field of daffodils 'fluttering and dancing in the breeze'.

What makes this poem an example of Romantic thinking? It isn't just that Wordsworth chooses to write about a natural scene: it is the way he describes the scene as if it had human emotions. For him, nature is not merely a neutral mixture of scenery, colours, plants, rocks, soil, water and air. It is a living force that feels joy and sadness, shares human pain and even tries to educate us human beings by showing us the beauty of life.

Wordsworth's home. Dove Cottage, is now one of the most popular destinations in the Lake District. You can go on a tour of the garden which William planted with wild flowers and which survived in his backyard even after they disappeared from the area. 'He always said that if he hadn't been a poet, he would have been a terrific landscape gardener,' says Allan King of the Wordsworth Trust, the organisation that looks after the cottage and gardens.

The Lake District in the north-west of England becomes particularly crowded during the summer months with tourists and ramblers eager to enjoy the region's majestic valleys, hills and sparkling lakes. Wordsworth himself was far from keen on tourists, which was quite apparent. He wanted outsiders to admire the local sights he enjoyed so much, but was afraid the district might be 'damaged' by too many visitors. He opposed the coming of the trains, and campaigned in the 1840s against a plan to link the towns in the area – Kendal, Windermere and Keswick – by rail.

The place near Ullswater, where Wordsworth saw the daffodils, is at the southernmost end of the lake. The lake is wide and calm at this turning point. There's a bay where the trees have had their soil eroded by lake water so that their roots are shockingly exposed. You walk along from tree to tree, hardly daring to breathe, because you are walking in the footprints of William and Dorothy from two centuries ago. The first clumps of daffodils appear, but they aren't tall yellow trumpets proudly swaying in the breeze. They're tiny wild daffodils,

most of them still green and unopened, in clumps of six or seven. They are grouped around individual trees rather than collecting together.

6. According to the article, the poem by Wordsworth

- A was written to the journal
- B was motivated by the foul weather
- C began the Romantic period in England
- D was inspired by the scene the poet saw

7. What was the poet's attitude to nature?

- A He felt nature could cause pain to people
- B He thought nature was a human being
- C He believed people could educate by nature
- D He believed nature had its own character

8. According to the text, Dove Cottage

- A has a wide range of wild flowers in its garden
- B attracts numerous visitors
- C has gardens designed by a terrific landscape gardener
- D wild flowers disappeared in the backyard of its garden

9. What is TRUE about Wordsworth according to the text?

- A He was against the railway link between towns in the area
- B He was afraid outsiders could admire the local sights
- C He was keen on tourists from far away
- D He welcomed tourists in the Lake District only in summer

10. What is NOT true about the place near Ullswater?

- A Trees near the lake have their roots washed by the water
- B William and Dorothy used to walk there
- C The daffodils are smaller and wild now
- D There are no daffodils around trees

Task 3

Awesome Animal Facts

- 11. Flamingos are known for standing in shallow water on one leg, but most people are unaware that due to the way in which they have developed a Flamingo has to use the bristles at the top of its beak to filter out the mud and water that gets sucked in along with its actual food. It therefore has to eat with its head upside down as otherwise it would be unable to filter its food properly.
- 12. Dolphins are mammals so although they live in the sea, and can hold their breath for an exceptionally long time, they do have to come up for air from time to time. It is for this reason that a Dolphin's brain will never fully rest, as it still needs to retain enough motor control to occasionally go up to the surface and breath. Dolphins also sleep with one eye open at all times.

- 13. On the surface this does not sound too strange but the size and weight of Blue Whales is much greater than most believe or can picture in their mind. The average Blue Whale weighs the equivalent of 3-4 Elephants, with the weight of 1 Elephant being in the Whales tongue alone! Take a second to think about that; its tongue weighs the same as an elephant...
- 14. Leprosy is a bacterial infection that affects humans and if left untreated will go on to cause severe damage to the skin, nerves, extremities and eyes; eventually leading to them going numb and allowing them to get secondary infections. Very few infections affect multiple species of animal, but leprosy is one of the few that actually can as it is able to infect both humans and, for some reason, Armadillos.
- 15. One of the ultimate survivors, the Cockroach, unlike most animals, can survive decapitation as its brain is not actually housed inside it, but rather inside of its body. Once decapitated a Cockroach will keep on ticking, walking around, going about its business; eventually dying from starvation as it no longer has a mouth to eat with.
- 16. The eyes of a Frog are made and positioned in such a way that at any given moment they can see everything around them, including what is behind them. As if this did not make them difficult enough to sneak up on, frogs also sleep with both of their eyes open.

Module 5 Travelling and Tourism

Part I TEST Частина "ЧИТАННЯ" Reading

Task 1

Read the text below. Match choices (A - H) to (1-5). There are three choices you do not need to use. Write your answers on the separate answer sheet.

Types of Tourism This kind of tourism is also referred to as grief tourism that involves visiting those places and sites, which have been witnesses to some of the major tragedies in history. Apart from their tragic histories of human suffering and bloodshed, most of these locations are also popular for their historical value. The curious human mind is often more attracted to places that are associated with things far from normal, and hence, sites bearing violent pasts have become popular tourist destinations, receiving a large inflow of visitors year after year. If you're a European citizen over 25 then there's a good chance you remember this term, which in reality was politically motivated. The phrase "benefit tourism" was invented in the 1990s. It was later used for the perceived threat that a huge number of citizens from the new, poorer nations who were given membership in the EU would move to the richer states such as France or Sweden to benefit from their social welfare systems rather than work. Tolkien tourism has become a growing trend thanks to the huge success of the "Lord of the Rings" books and films. It has expanded and diversified to such an extent that now it offers enough places to visit so that even the most detailed curiosity of the most demanding Tolkien fan is sure to be satisfied. That makes New Zealand the best hotspot because it's the main location where the films were shot. The name "shark tourism" says it all, and you probably can't get a scarier or more dangerous type of tourism than this. Shark tourism is actually a subgenre of another type of tourism – ecotourism. It attracts all these people who love sharks and their bloody jaws. Anything related to the Great White shark (and other) is what's on offer. Experienced divers and protective cages are must-haves for this adventurous kind of tourism.

A fascination with ghosts drives some people to travel in search of the paranormal. Behind many famous landmarks is a great ghost story and indeed, popular tours in places like Dublin, Florida, Quebec City and Brisbane explore historic, "haunted" city quarters. Locations of "ghost tourism" include proverbial ghost towns across America, Canada and Australia as well as notorious places like Jonestown, Guyana, and parts of Transylvania.

- A Haunted history tours
- B Enjoy free time in remote regions or settlements
- C Immigration tourism
- D Cost effectiveness of domestic tourism
- E Dark tourism as a unique form of mourning tourism
- F For those keen on science
- G Appealing to all fans
- H For brave ones only

Task 2

Read the text below. For questions (6-10) choose the correct answer (A, B, C or D). Write your answers on the separate answer sheet.

Egypt Travel Guide

Courtesy and hospitality are important when doing business in Egypt. The host of a business meeting will usually offer tea or a small snack before commencing. It's polite to refuse the first offer, but once the host insists, the guest should then accept.

Alcohol is legal, but should be avoided until visitors know their Egyptian colleague's attitude towards drinking, and, if acceptable, should be drunk in moderation. It is not considered suitable for women to over-indulge in alcohol. If invited to a business lunch, expect food to be lavish and plentiful.

Throughout the Arab world, it is considered bad manners either to display anger or to openly criticize another person in public. Tact and diplomacy are always required. In social life, punctuality is almost laughable. For business, visitors should be on time but expect locals to be often late, and do not take offence. Men should not offer to shake a woman's hand, and vice versa, unless clearly invited to do so. Men and women should dress smartly for business meetings – suits and tie for men; suit for women or smart trousers/skirt/jacket – and always dress modestly. Shoulders and knees should never be shown.

On taking power in 1970, Anwar al-Sadat introduced a policy of *infitah* (openness) towards investment. Egypt's economy underwent rapid growth during the 1970s with the quick expansion of the oil industry, tourism and the Suez Canal, and it has continued to expand in subsequent decades.

The tourist sector is expanding rapidly, particularly along the Red Sea and Mediterranean coasts, despite sporadic terrorist activities of Islamic fundamentalists. Agriculture, which relies on irrigation from the Nile, employs one-third of the working population. Foreign aid, especially from the USA, is an important source of government funds.

There are internet cafés in the main cities, including Cairo, Alexandria, Dahab and Luxor. Even small, more remote towns including Siwa will have at least one venue, usually in the market area. Connection is usually reliable. Tourists can also access the Internet in hotels, with in-room Wi-Fi available, though often at a costly price.

The Egyptian press is one of the most influential and widely read in the region, while Egyptian TV and the film industry supplies much of the Arab-speaking world with shows from its Media Production City. Press freedom is encouraged. Press laws which allow prison sentences for libel have encouraged self-censorship on sensitive issues.

Part I TEST Частина «Читання» Reading

Task 1

4.

Read the text below. Match choices (A - H) to (1-5). There are three choices you do not need to use. Write your answers on the separate answer sheet.

Clothing

Clothing is a distinctly human artifact. Even more than the use of tools, it distinguishes humans from the other creatures on this planet. While there are other creatures which use implements to a greater or lesser degree, clothing is unique to humanity. Clothing is also uniquely human, in that it serves more than one function. The basic purpose of clothing was originally utilitarian. By putting on an artificial skin, humans were able to move into regions where they otherwise would have been unable to cope with the climate.

2.

Clothing tells us many things about the wearer. It can be used to indicate whether she is a member of a particular group or organization, the most extreme example of this type of clothing being a uniform. It tells us a lot about the importance of clothing that the clothes a person was wearing have been, literally, the difference between life and death. In war, soldiers recognize friends and enemies by their uniforms. Spies may be shot if captured, but if they go about their business in the uniform of their country, they are regarded as legitimate members of that country's armed forces.

Uniforms can also be less formal. Anyone who has seen a group of teenagers walking together will have noticed that their clothing conforms to the standard set by their particular group. Nor are teens the only ones who are subject to such pressures. It is a rare businessman who does not feel the need to wear a suit and tie. Most politicians also try to be neat and well-dressed. People who wish to impress others often do so by the selection of their clothes – sometimes by choosing more expensive versions. This can be seen particularly in the fashion industry, where clothing by a particular designer fetches prices which are out of all proportion to the actual utilitarian value of the material.

The significance of what we wear and how we wear it is, if anything, becoming more rather than less important as the cultures of the world mix and sometimes come into collision. There have been cases on holiday islands where the locals have a strict conservative tradition and have been outraged by visitors — especially female visitors — who wear far less than the minimum that the locals consider decent. The humble headscarf has become a symbol of conformism to religious values, and some westerners are as affronted by a woman wearing one as others in the Middle East are upset by its absence. (Yet in medieval Europe, both men

and women habitually kept their heads covered in public, and almost always when outdoors.) Indeed, the signals given by clothing as worn by men and women have not decreased because many women now wear what were once "men's" garments. For example, today most women are very comfortable wearing jeans. Yet the sight of a man in a dress would raise eyebrows in most western cultures. For even though the signals given by clothing change over time – the ancient Romans thought that only barbarians wore trousers – the signals themselves are as strong as ever. It is impossible not to signal something about yourself in the clothes you wear, for even not trying to say anything is itself a strong signal.

5.____

Therefore, even though we are steadily managing to adjust our micro-environments to temperatures which are as close to ideal as the human body wants, and even though sexual taboos of undress are being steadily eroded, it is highly unlikely there will be no use for clothing in our future, unless humanity evolves into a completely new species.

Task 2

Read the text below. For questions (6-10) choose the correct answer (A, B, C or D). Write your answers on the separate answer sheet.

Fashion Facts

Did you know the trend toward shorter skirts for women started with the advent of the automobile? Or that more than two billion t-shirts are sold each year worldwide? These fashion facts are as diverse as the clothes people wear!

1. Weddings weren't always white

A woman walking down the aisle in a white dress is an iconic image. But, traditionally, women did not wear white on their wedding day. In many countries, white was considered a grieving colour. That was until Queen Victoria wore white to her wedding with Prince Albert. She was one of the first women to do so. Queen Vicky really was the trend setter!

2. The first models weren't humans

Initially, designers did not use men and women to model their new designs. They used dolls to display fashion trends. But in 1853, the "father of Haute Couture," Charles Frederick Worth, asked his wife to model his designs. His wife, Marie Vernet Worth, is therefore the world's first fashion model. This is where the term "house model" came from.

3. Buttons aren't always for buttonholes

If you know much about history, then you know Napoleon's armies spent some time in the cold. When people were out in the cold, their noses ran. When noses ran, people wiped them on whatever they could find.

Soldiers didn't always have a tissue handy, so French soldiers resorted to wiping their noses on their coat sleeves. This bothered Napoleon so much that he had tailors sew buttons onto the sleeves of the soldier's jackets. These buttons served no real purpose other than to be uncomfortable when people would wipe their noses on their sleeves.

4. The Little Black Dress changed things

Coco Chanel designed the infamous Little Black Dress in 1926. She revealed the dress at a time when many other designers were embracing patterns and colours. Traditionally, those in service like butlers and housemaids, wore simple black garments. Chanel changed everything. When Vogue put the LBD on the cover, they compared it to the Ford Model T – a classic in its own time. By combining a simple garment with opulent accessories, like necklaces and bags, a new fashion staple was born.

Chanel herself said, "One can be overdressed, but never overelegant." With the Little Black Dress, the wearer is never overdressed, only ever elegant.

5. Barbie is a trendsetter

Most little girls get their first taste of fashion by playing with their Barbies. Today, there are countless outfits and careers for Barbie enthusiasts to explore with. But did you know the first outfit Barbie came wearing was a black and white swimsuit?

Barbie's first job was very different than a toy for children. She was originally a model. Fashion designers such as Yves St. Laurent, Calvin Klein, Versace, and Armani have all worked on her outfits over the years.

6. What is true according to the information from the 1 paragraph?

- A Queen Victoria was the first woman who was wearing blue for wedding
- B White was considered a colour of war
- C Queen Victoria set a trend wearing white in the streets
- D White was the wedding colour of Queen Victoria's wedding to Prince Albert

7. Who were the first models?

- A Men and women were used originally to model new clothes.
- B Charles Frederick Worth's wife was the first "house model".
- C House model was used to model new designs at home
- D Dolls were used to show fashion to Marie Vernet Worth

8. The real fact about the buttons on clothes is the following:

- A Napoleon liked the soldiers' fashion with buttons
- B French soldiers spent time in uncomfortable conditions, and buttons prevented them from getting cold
- C Tailors sewed buttons onto the sleeves of the soldier's jackets for their comfort
- D Buttons prevented soldiers from wiping their running noses

9. What is true about the Little Black Dress design?

- A The wearer of the Little Black Dress can be overdressed
- B Coco Chanel designed dresses for housemaids
- C It was compared to a classic automobile after it appeared on the Vogue cover
- D The little Black Dress was never combined with expensive necklaces

10. Who is Barbie?

A A toy wearing black and white

- B A model wearing colourful clothes
- C A model whose outfits have been designed by fashion couturiers over years
- D A little girl with a good taste of fashion

Task 3

Read the texts below. Match choices (A - H) to (11-16). There are two choices you do not need to use. Write your answers on the separate answer sheet.

Ethical Fashion Doesn't Have to Be Expensive & Exclusive

We're sharing brands that make ethical shopping an affordable experience

11. Outdoor Voices

Ethics | Uses recycled materials, ethical production

Product Range | Adult activewear

Price Range | \$25 - \$80

Outdoor Voices creates high-quality activewear that encourages wearers to get outside and be active. The brand is always on the lookout for better, more sustainable technical fabrics, like the recycled polyester and sustainably-produced Merino wool. From the adult activewear separates to the affordable outfit kits, these durable and ethical athletic essentials will have you. #DoingThings in no time.

12. ABLE

Ethics | Artisan-made in Peru, fair labor practices

Product Range | Women's apparel, denim, shoes, bags, jewelry

Price Range | \$25 - \$80

ABLE believes that to end generational poverty, you must create economic opportunities so people, specifically women, can provide for themselves. The brand's beautiful bags are made all over the world by fairly-paid women who've overcome extraordinary circumstances.

13. TENTREE

The Good Trade Partner

Ethics | Ethically-made, organic, eco-friendly, gives back to the environment

Product Range | Adult apparel, hats, backpacks, and accessories

Price Range | \$25 - \$80

TENTREE is rooted in the belief that we have a responsibility to protect and preserve the world we live in. This earth-first apparel brand celebrates its commitment to our planet with ethically-crafted and sustainably-designed products, all the while planting ten trees for each item purchased. With a motto of "Buy one, plant ten," TENTREE believes that you don't have to be a hardcore environmentalist to make a difference. The brand has now planted over 35 million trees around the world, and is well on the way to planting one billion trees by 2030.

14. Thought Clothing

Ethics | Organic, eco-friendly, sustainable Product Range | Adult apparel, socks, accessories Price Range | £25 – £300

Thought makes eco-friendly clothing from organic ingredients, including cotton, bamboo, and hemp. Boasting a wardrobe of unique colours and gorgeous styles, the UK brand offers affordable pieces that are

perfect for work, a night out, or even lounging (don't miss the cozy nightwear). Don't worry if you're not a UK resident; Thought ships worldwide!

15. People Tree

Ethics | Fair trade, certified organic Product Range | Women's tops & bottoms, dresses, skirts, accessories, gifts

Price Range | \$80 - \$500

It would be remiss of us not to include the fair trade pioneers, People Tree. Also based in the UK, this brand creates beautiful garments that last – items we bought years ago still look stunning as the day we purchased them. All clothing from People Tree is fair trade and made with eco-friendly, organic fabrics.

16. Kotn

Ethics | organic, safe & fair labor standards, gives back

Product Range | Adult cotton basics

Price Range | \$25 - \$300

Kotn is known for clothes made of soft and remarkably breathable Egyptian cotton. Working directly with farmers, the brand pays fair prices for cotton and assists suppliers in making the switch to organic. With affordable basics (we love the classic white tees and nostalgic 90s sweatshirts), Kotn is crafted with quality and comfort in mind. So long, consumable t-shirts.

Christmas Shopping

Each year, we repeat the same last-minute purchases and overspending mistakes. Here are some tips for

wise shopping during the holiday season.

Make a list and a budget

If you (33) ______ a list of gifts to buy, you'll have a good idea of how much money you'll spend in total. Calculate the amount that you know you can realistically spend on gifts without affecting your family's current expenses. Avoid (34) _____ impulse purchases on a credit card that you know you (35) _____ to

Plan with the Internet

Instead of going (36) _____ a (37) ____ and exhausting tour of the stores, do some screen shopping! Almost all stores have a website, some of them even allowing you to check an item's availability in a store near you. It's a very practical way to save some time and avoid going across town to find a specific gift.

Look for deals!

pay for a long time.

In recent years, deals start several weeks before Christmas. Some items are sometimes (38) _____ a 50% discount to attract customers. It's up to you to take advantage of these great offers, without buying too much of course!

Beware (39) _____ gift cards

You (40) _____ think that you'll please someone by giving him/her carte blanche, but there is increasing evidence that gift cards are not used by many. In this case, it is often better to give money directly instead of a gift card.

Choose your battles!

Shopping in the middle of the Holidays is exhausting! On the weekends and some weeknights, malls are so packed that we get (41) ______ before we even complete our purchases. If you can, try to go shopping at the beginning of the week. Avoid dressing too (42) _____, drop your coat in a mall locker, take a coffee break to rest a little, do whatever it takes to make your outing fun and not painful.

Tongue Trickster

Never mind the tongue twister – here's the tongue trickster. Frank Parsons reports on the craze for a strange type of fruit. Imagine drinking a glass of pure, freshly-squeezed lemon juice with nothing added. It's enough to turn your stomach.

Yet that is what the guests of host, Larry Walters, are given on their arrival at one of his tasting parties in an upmarket district of New York. I watch as one-by-one they down the drink, tentative at first, and then smiling broadly as they declare, "It tastes just like grandma's lemonade."

Fifty or so people crowd around a table on the rooftop terrace of Larry's small but swish apartment. I edge my way forward and arrive at the table that positively groans with the array of food piled high.

These range from wedges of fruit, strong cheeses and pickles to plates of Brussels sprouts. My host appears at my shoulder, and says, "Here, have this." This turns out to be a small red berry about the size of a blueberry, but slightly elongated, the shape of a coffee bean. He looks at the expression on my face. "It's known as the miracle fruit. Just put it in your mouth," he instructs, "and chew it slightly to separate the pulp from its seed. Then push it around your mouth like you'd do with a piece of gum for about sixty seconds".

I obey his command and then discreetly spit the remains into my handkerchief while his glance is averted. "Done?" he asks, turning back to me. I nod. He grabs a glass of the lemon juice from a passing waiter and offers it to me. "Now drink." I take a small sip, and close my eyes. The guests are right.

It's like I've been transported back to childhood, sitting on the porch with lemonade. My host states knowingly I have experienced first-hand the phenomenon of the Synsepalum Dulcificum, or the Miracle Fruit. This small berry has the amazing effect of causing bitter or sour foods to taste as sweet as sugar candy.

According to scientists the result happens because of a protein called miraculin. When it comes into contact with acidic foods, like vinegar, it starts to behave like a sweetener.

This native fruit of West Africa was discovered by western explorers around 1725. They first noticed its distinctive property when they saw local people chewing the berry. Left uncultivated, the miracle fruit grows in bushes reaching six metres in height. It produces crops twice yearly, usually after the rainy season, and has

attractive white flowers. Despite being around for centuries it is only in recent years that the miracle fruit has been cultivated as a potential sweetener. There has been some limited interest from the diet food industry. Not only that – the fruit can aid patients receiving medical treatment that may leave an unpleasant taste in the mouth.

Hungry Popstars

Valerie runs a company called Peanuts whose job is to look after pop stars and pop groups when they go on tour. She is the person who feeds the stars and she's been doing it for the past ten years.

When the stars are playing at a festival Valerie may have to cook for up to a thousand people which includes all the crew and the people who work backstage. She erects a marquee – a huge tent – and the food is served buffet style from a central serving area. She has to cater for different tastes, so there are normally four or more choices of menu. She also has to look after people who may be on a special diet or some singers who don't eat dairy food before a concert.

She drives an enormous truck full of kitchen equipment and hires at least three walk-in refrigerators, a dish washing unit and portable cabins which act as storerooms and office.

All the bands have to queue up to be served and everyone has to have a meal ticket. The stars are usually more relaxed when they are eating as no one is bothering them for autographs, although Valerie says that sometimes the security men and the stars' managers are more trouble than the stars themselves. There are certain things which she always has to keep in stock like herbal teas and her own particular mixture of honey, lemon and ginger which singers like to keep in flasks on stage with them when they're singing. Years ago bands used to drink quite a lot of alcohol, but these days they're much healthier. Most bands drink fresh fruit juice and prefer to eat salads.

A lot of people in the bands are quite young and they're not used to very expensive food, so Valerie prepares plain food unless a band sends her a 'rider'. This is a list of special requirements. When people are tired, unwell or homesick they like to have familiar 'comfort' food so she keeps a stock of people's requirements just in case. As a result of all this, Valerie says she has become an **expert shopper** and in less than an hour in a supermarket she can spend \$1000.

A lot of bands won't eat before a concert because they're too nervous, so Valerie and her staff can end up working very long hours as they have to be around to provide what people want at two or three in the morning. One thing Valerie has noticed is that the madder a band is on stage, the more normal they are when they are off it. She says she is amazed at the change in behaviour. A really wild singer can turn out to be really quiet and polite off stage.

(Adapted from: https://www.bbc.com/news/world)

6. Valerie has to provide a range of food because

- A people are not very normal about what they eat
- B people are used to eating in restaurants
- C there is such a wide variety of preferences
- D there is such a demand for special menus

7. The singers are less nervous when they are eating because

- A their security men are with them
- B there are no fans hanging around
- C their managers fuss over them
- D the bands enjoy eating together

8. Why does Valerie have to keep a supply of certain drinks?

- A The bands rely on a special recipe
- B The bands prefer herbal tea to coffee
- C The bands take fruit juice on stage
- D The bands like to drink alcohol

9. What does an 'expert shopper' in paragraph 5 refer to?

- A Someone who has a lot of money to spend each week
- B Someone who has to shop very quickly in a supermarket
- C Someone who has to buy as much as possible for \$ 1000
- D Someone who has learnt to find what individuals want

10. What is NOT true according to the text?

- A Valerie thinks singers are completely crazy on and off stage
- B Valerie thinks singers behave differently on and off stage
- C They are wild when they are on stage
- D They are normally really quiet off stage

TAKING THE PLUNGE

If you're thinking about the idea of turning vegetarian but you are afraid it may be boring or too expensive, think again. Last October, we challenged a typical meat-eating family to go on a vegetarian diet for at least seven days.

11. SUE KENT, 42 said 'I'm quite health conscious when it comes to food, so we'd already started to cut out red meat.' To start the week, and put everyone in the right frame of mind, Sue prepared a family favourite, vegetarian chilli. The rest of the week followed like a dream. The recipes all went down extremely well,' says Sue. The tomato and pasta soup was popular, as was the pasta with tomato and mozzarella sauce, although I've altered it, using a vegetarian blue cheese sauce because that's one of our favourites. I've carried on doing fish which most of us like.'

The Kents were so impressed by the flavours and variety of their new food regime that when the week ended they decided to continue on a largely vegetarian diet. But making the change wasn't all plain sailing. The big drawback is all the preparation involved,' says Sue. 'It takes much longer than before because of all the chopping.' says Sue. So do they feel healthier for their new eating habits? 'It's hard to say, but I think on the

whole we do,' says Sue. 'I certainly experiment more with my cooking and use more herbs and spices than I used to. I'm trying out lots of unusual vegetables that I wouldn't have tried before, such as okra.

What's the overall verdict? Here's what each member of the Kent family had to say.

- 12. MICHAEL, 46 'I must say I have been quite impressed by some of the recipes Sue has prepared,' says Michael. 'I love curries and other spicy foods, and we have plenty of those. I reckon vegetable curry is as good as meat curry. The one thing I do miss is the chewing you do with meat, something substantial to get your teeth into. If I was out to dinner I don't think I would refuse a steak. I do miss roast lamb but on the whole I think it has been a great success.'
- 13. JO, 16 was the main driving force behind the family trying our plan and the biggest convert, becoming a strict vegetarian after taking up our challenge. 'Jo used to eat chicken, but she doesn't touch meat or fish at all now,' says Sue. 'She doesn't even miss sausages!'
- 14. MARY, 81 Michael's mother was the most hesitant about vegetarianism, but nevertheless she tried everything and liked many of the dishes. However, she did find that too much vegetarian food can affect her digestion. 'It's been quite interesting but I wouldn't like to think I was never going to eat meat again,' she says. 'I prefer simpler, plain foods like egg and cheese or fish to the more exotic foods like okra and peppers. I've never liked herbs and spices either, and I'm not much of a pasta fan.'
 - 15. KATE, 13 'I'd quite happily never eat meat again, although I'd find it hard to go without fish.'
- 16. ROBIN, 21, currently eats fish but he doesn't really care for it. So Sue expects he'll be a total vegetarian before long. 'Apart from that, he's not a fussy eater on a good day he'll eat anything,' says Sue. 'He loves pasta, and vegetable soup goes down well.'

Cyber Cafes

In the early nineties in Great Britain going for a coffee and surfing the net were new and exciting things to do. (17)________of two things: coffee and the Internet. Ten years later the picture changed and in the 21st century millions of people can use the Internet from home, work, school or university. In many ways the Internet has become a personal playground and as far the coffee, well, there's a lot more choice of different coffee shops serving every kind of coffee you can wish for.

So who's using the cyber cafes now that surfing the Net is as ordinary as waking up every morning? Some people say that if their computer goes wrong at home they don't bother to get it fixed. They will rely on the cyber cafe to find out (18) _____ and to check their e-mail; they feel that there is nothing special about cyber cafes any more. These cafes are part of the cultural scene in the same way that cinemas and supermarkets are.

in India there are four types of puppetry mainly	: - String puppets, Rod puppets, Glove puppets and Shadow
	dia. Being a flexible traditional folk form puppetry also plays
social role and helps in psychological therapies a	ilso.

The popularity of television advertising swelled along with the popularity of mass marketing. Today television is one of the most popular mass media channels for marketers, especially with the advent of connected

TV advertising, which uses viewer data for more effective segmentation. Video ads have also expanded beyond the traditional cable box to include YouTube ads and online video. Media planners can now showcase their commercials across the web on various websites to connect with audiences online.

5.

Netflix started in 1997 as a company that pioneered the concept of renting DVDs by mail. It devised the innovative concept of charging a flat monthly fee instead of charging by each DVD ordered. As a result, the corner video rental store phenomenon started to fade away. By 2005, Netflix had a loyal 4.2 million DVD-by-mail rental subscriber base. In 2007, Netflix made the bold announcement that it would add the ability for subscribers to stream TV shows and movies directly to their PCs in addition to its DVD-by-mail rental program. After that, it didn't take long for Netflix streaming to become available on the Xbox, Apple devices, a growing number of TVs, smartphones, and tablets. Today, it's readily available in many households.

- A This type of media has many forms and can serve several social functions
- B This type of media was used in Asian countries
- C The messages through this medium are still used by authorities to highlight social questions

- G Advertising on TV is popular among the people
- H This type of medium tries to find new ways to reach the consumers

Task 2

Read the text below. For questions (6-10) choose the correct answer (A, B, C or D). Write your answers on the separate answer sheet.

The History of YouTube

YouTube (an American online video sharing platform owned by Google) was launched on February 14, 2005 by Chad Hurley, Steve Chen, and Javed Karim. The founders of YouTube wanted to create an easy way on how people could upload and share videos worldwide. Before YouTube was introduced, there were no reliable sources for one to share videos on the internet. For this reason, the three buddies, Chad Hurley, Steve Chen, and Jawed Karim thought of starting a platform where people could share their beautiful experiences through online videos. However, YouTube had a hard time getting traffic in the first months after the launch. They uploaded the first video titled "Me at the zoo" featuring Jawed Karim on April 23, 2005. But despite starting low, YouTube has risen to become the best video upload site and the 2nd most visited online site after Google.

Before YouTube was founded, other video platforms such as Realplayer, Windows Media Player, Google Video, and ShareYourWorld were available. However, these sites required many processes before uploading videos and were expensive to the users as one was required to pay before sharing videos. YouTube brought better ways to upload, access, comment, like, and share videos with fewer requirements, unlike the early sites. Unlike previous video uploading platforms, YouTube grew to become the world's best video-sharing website.

The three YouTube founders were enjoying a dinner party at Steve Chen's apartment. At this party, Chen and his friend, Chad Hurley spent much of the party shooting videos and digital photos of each other. They easily uploaded the photos to the Web. But the videos? Not a chance. Realising that digital photographs were easier to share thanks to new Web sites like Flickr, they reasoned that a similar software package to share videos was possible, too. But, stumbling across a need to publish a video to the Internet, the friends decided to create a video sharing website on which users can upload and share videos. And they had the means to address this need, because Chen was an exceptional code writer, and Hurley's gift for design could give a new Web site a compelling look.

The team relocated to a more spacious office situated above a pizzeria and Japanese restaurant in San Mateo, California, to get their plans underway. The YouTube creators did a commendable job as they uploaded

their first video (Me at the zoo) on April 23, 2005, and later shared with the public the better part of the site activities in May 2005. Six months later, YouTube was officially launched in November 2005. In the same month, YouTube got US\$11.5 million to boost their project.

In 2006, YouTube created a spark in the digital market as it announced over 65000 new videos were uploaded daily and had over 100 million video views every day. In the same year, Google purchased YouTube at the cost of US\$1.65 billion. Also, YouTube introduced video ads to the site. Although Chad Hurley first rejected it as he thought it would be inconvenient to its users, YouTube finally accepted pre roll adverts in August 2007. It soon became the dominant online video upload and viewing site with a 43 percent market share and more than 6 billion video views in January 2009. Since then, YouTube has become the best film platform for artists to showcase their knowledge and skills to the world.

Mass media is any medium which can be used to communicate whether written, oral or via broadcast to a larger audience. There are tons of modes of mass communication that have been introduced to convey

information to larger audiences such as the internet, computers, mobile phones, books, magazines, documentaries, films and much more.

- 11. Traditional media. People have developed different ways to communicate on the basis of their local culture and language. Traditional media is the oldest type of mass media which is helping people to transfer culture and traditions over generations. Communication tools in this sphere have been developed from customs, beliefs, rituals, and society's practices. Traditional media is imparting indigenous ways to communicate for ages. There are multiple forms of traditional media which are being used for centuries. They are, for example, folk music, songs and dances; drama, theatre and folktales; painting, statues, sculptures; symbols and motifs; nautanki; storytelling; festivals and fairs.
- 12. Print media. Print media encompasses mass communication via printed material. Before the invention of the printing press, printing media meant to be handwritten. Later with the passage of time, print media also evolved and printing press arrival made mass distribution possible. Till now, print media is one of the basic mass media tools types. Newspaper is one of the most preferred forms of print media to reach a huge audience until electronic media emerged on the scene. Earlier, newspapers were dominant medium which masses at large depended on, for a regular news update. It is because a newspaper used to carry different type of topics including current affairs, finance, politics, entertainment, stocks, puzzle crosswords. In a nutshell, newspaper used to keep stuff for readers from every age group. Newspaper is still the most important form of print media because it has the ability to reach every nook and corner of the world.
- 13. Electronic broadcasting media. Broadcasting is simply known as a way to distribute video and audio content to a dispersed audience with the help of an electronic broadcasting medium. It can appeal both visual and auditory senses which is making it one of the most lucrative types of mass communication media. For this profitable type of media communication, presence of electric connection is a must. One of the most common electronic broadcasting media sources is known as TV. Radio offers auditory content only.
- 14. Outdoor media. This is a type of media which is focused on transit information when people are out of their living places. Outdoor media is more commonly being used to display advertisements, and to attract people towards some social cause which can bring a change in society or new product, etc. The forms of outdoor media are billboards, banners, posters, and signs.
- 15. Transit media. This is a mass media type which revolves around the concept of information dissemination or advertising when customers are about to go. This mass media type includes the display of information or advertisements on vehicles, buildings, etc. with a common aim of driving message to home. This type of mass media is more commonly being used for massive brand promotions to the people who are travelling on the roads and streets of the country.
- 16. Digital media. With the arrival of the internet, we are able to enjoy the benefits of high-technology digital mass media. This type of media is not only faster as compared to old school mass media but also comes in a wider range. However, computers, the internet and mobile phones are more commonly referred to as digital media. The Internet has opened a new world of opportunities for effective mass communication in the form of emails, podcasts, e-forums, blogging, internet TV, websites, eBooks and much more than these. The forms of new-age media are evolving and increasing with every passing day. Even more, the presence of social media networks on the internet has redefined the way of mass communication altogether. Platforms such as Facebook, Instagram, Twitter, YouTube, has made the process to communicate with masses all more convenient, interesting, entertaining and easier. These have become some of the most common sources to reach an audience from all around the world.

5 Uncomfortable Truths about Living in Alaska

ALASKA is one of the most beautiful and unspoiled places in the world. It is an environment of coastal mountains, vast unspoiled tundra, ice fields, and rivers teaming with fish. As idyllic as this state is, life here in Alaska is not without its challenges.

Here are 5 uncomfortable truths about living in Alaska.

1.____

The hazards of the 49th state are frequently exaggerated, but they're not complete works of fiction. According to the bureau of vital statistics, roughly 400 people a year succumb to an untimely dying in Alaska making it the second most deadly state in the Union. Although bear attacks always make headlines, they are few and far between compared to the number of people who fall out of boats, break through frozen lakes, or simply die of exposure in the extreme cold. As moribund as that sounds, the largest number of accidental deaths are far less dramatic. Dozens of Alaskans die each year in their sleep from carbon monoxide poisoning due to faulty heaters or clogged chimneys.

2. _____

Every winter thousands of Alaskans get SAD. More than just a little down in the blues, they become crippled by the symptoms of Seasonal Affective Disorder (SAD). Given its geographic place on the planet, winter in Alaska is not just cold, it is dark. Daylight in the northernmost regions is nonexistent for months at a time creating a physiological shift in mood and disposition. Sufferers of SAD often experience anxiety, malaise, and deep depression. In an attempt to cope many turn to overeating, extended periods of sleep, booze, or drugs. As the symptoms become more severe this can be a causation of suicide. Alaska ranks second only to Wyoming for the highest rate of suicides in the country.

3._____

Tourism is the second largest industry in Alaska. About 2 million tourists visit the state each year, more than half arrive by ship. As one of the most popular cruising destinations in the world, more than \$60 million dollars in revenue is collected by coastal towns through docking fees and other taxes. But the cost to the environment is incredible. Despite strict environmental regulations and diligent watchdog groups, cruise ships continue to pollute the pristine waters they run.

4.

As beautiful and unspoiled as it is, Alaska is a difficult place to inhabit. The climate is harsh and the rigours of daily life can extol a heavy price. For some residents, the stress of Alaskan living boils over into violent conflicts. According to statistics provided by the FBI and the United States Census Bureau, Alaska is

second to only Tennessee as the nation's most violent state. Despite higher than average incomes, a low poverty rate, and a rare population density, violent crimes are surprisingly frequent. The Anchorage Daily News reported that more than 37% of all Alaskan women reported some form of sexual assault.

5.

The largest employer and biggest driver of revenue in the state, the oil industry reigns supreme in Alaska. Even those not directly affiliated with oil production or transport get a cut of the action. The Alaska Permanent Fund was established in 1976 to allow all full-time residents to buy oil stocks. Each year the state pays residents a cash dividend, the largest was in 2008, when every Alaskan received more than \$3,200 in the mail.

- A Tourism helps to protect the environment
- B Alaska is not a safe state for residents
- C Alaskans suffering from depressive disorders
- D Controversial benefit of visiting
- E Alaska residents pay oil tax
- F Bears are not the only threat to residents' lives
- G Alaska is the coldest region on the planet
- H Alaskans benefit from oil deposits

Task 2

Read the text below. For questions (6–10) choose the correct answer (A, B, C or D). Write your answers on the separate answer sheet.

Euthanasia: Life or Death

Euthanasia is the termination of an extremely ill person's life in order to relieve them from the suffering the illness is causing. Euthanasia is usually only conducted on a person with an incurable condition, however there are other instances when euthanasia can be carried out. In many countries, such as the UK, it is illegal to assist anyone in killing themselves. Should a terminally ill patient in a great deal of pain and discomfort be allowed to terminate their life, if that is what the patient desires? And who has the right to deny a patient who is in complete suffering a less painful ending to their lives? These questions cause a huge amount of controversy, and have been strongly debated. Those in favour of euthanasia argue that it should be up to the patient, whereas those against argue that euthanasia could be misused, leading to very disturbing situations.

A strong ethical argument against the use of euthanasia is that it could soon become a slippery slope, with the legalisation of involuntary euthanasia following it. Since involuntary euthanasia is indistinct from murder it would be impossible to regulate, causing the danger of murderers not being brought to justice, due to their crimes being passed off as involuntary euthanasia. There is also concern that doctors could end up killing very sick patients without asking for their permission, and in the worst case scenario, begin to kill off patients to free up beds in hospitals, or to save money. These situations show how dangerous it could be to let the legalisation of euthanasia lead into the legalisation of involuntary euthanasia.

On the other side of the debate, there is a strong argument that people should have the right to terminate their lives, whenever, and however they may wish. Many supporters of voluntary euthanasia believe that everyone has the right to control their body and life, and should be free to decide at what time, and in which manner they will die. The idea behind this is that unnecessary restraints on human rights should be avoided. Since the right to life gives a person the right to not be killed if they do not want to, proponents of euthanasia argue that respect for this right will prevent euthanasia being misused, as killing a patient without their permission would violate their human rights. It can also be argued that because death is a private matter, if there is no harm to any other people, there is no right to deny someone's wish to die. Supporters of this believe that if euthanasia promotes the best interests of all the parties concerned, and no human rights are violated, then it is morally acceptable for voluntary euthanasia to take place.

Another argument against euthanasia, this time a practical one, is that euthanasia is not needed when proper palliative care (an approach that improves the quality of life) is available. Terminally ill patients are given drugs and other types of support to help relieve the physical pain and mental effects of being terminally ill. Not all of the trauma experienced by a patient is physical however, and drugs alone cannot relieve the emotional pain felt by someone counting the days until their death, although the emotional support that can be provided from palliative care can go a long way to make the last part of a terminally ill patients life less emotionally stressful. Effective palliative care will give the patient and their loved ones chances to spend quality time together, and will allow the patient to live the remaining part of their lives with as much of the distress and pain felt by a terminally ill patient removed as possible. Some argue, however, that along with the introduction of euthanasia, there could be a reduction in the availability of palliative care, as euthanasia is more cost effective than prolonging the life of dying patients. This could possibly reduce the availability of care for terminally ill patients who do not wish to be euthanised.

People generally avoid death because they enjoy and value being alive, but in the case of a terminally ill patient, they may be in a lot of discomfort and pain, and are unable to enjoy their life. This may cause the patient to devalue their life, and the patient may decide that they do not wish to endure their suffering any longer. There is also the fact that although the patient themselves may wish to be euthanised, it may have a very detrimental effect on the family of the patient. Those in favour of this argument believe that since the death of a patient in that situation could be a better option to keeping them alive, the patient's wish should be respected.

6. Which issue is causing a lot of debate?

- A How should relatives be involved in the process?
- B Should euthanasia be legalised in all countries?
- C Should a terminally ill person be isolated?
- D Is it illegal to help somebody to die?

7. The main reason against euthanasia is:

- A Involuntary euthanasia can prevent from dying.
- B Doctors can lose extra money.
- C It is difficult to distinguish from the killing.
- D Euthanasia can be used as a penalty.

8. TRUE Pro euthanasia argument is:

- A To permit law violation.
- B To take control of our own lives.
- C To transfer the right to control one's life.
- **D** The person's death is a public matter.

9. FALSE Con euthanasia argument is:

- A Palliative care helps to avoid emotional stress.
- B Special drugs are not enough during the treatment.
- C Palliative care is obligatory used before euthanasia.
- **D** It is cheaper to euthanise than to use palliative care.

10. It is better for a terminally ill patient

A to terminate his life voluntarily.

B to respect the relatives' will.

C to be euthanized involuntarily.

D to avoid death because he suffers.

Task 3

Read the texts below. Match choices (A-H) to (11-16). There are two choices you do not need to use. Write your answers on the separate answer sheet.

The Noblest Nobel Prize Winners of All Time

11. Mother Teresa

Mother Teresa accepted her Nobel Peace Prize in 1979. She's a virtual brand name when it comes to charity. In 1950, Mother Teresa launched a Catholic organisation called the Missionaries of Charity, which began its work in India, helping to ease the suffering of poor, sick and orphaned people. In time, the charity grew to care for AIDS sufferers and people displaced by war, famine and other catastrophes, both natural and human-caused. She remained committed to the charity for more than 40 years. She died in 1997, but many carry on her mission. Her organisation is still active in more than 130 countries.

12. Martin Luther King, Jr.

He had a dream, and he didn't write it off as a fanciful midnight vision. He paid for it with his life. In a country riven by racial discrimination and a legacy of slavery, King promoted equality and freedom for everyone. It all began with a famous flashpoint. In 1955, Rosa Parks refused to give up her bus seat to a white person in Montgomery, Ala. This incident led to a successful 382-day bus boycott led by King, and it cemented his role as a leader for blacks in the United States. After the boycott, and in the face of government and cultural intimidation, he hit the road to spread his message, speaking more than 2,500 times and travelling more than 6 million miles. Eventually, his means subverted a deeply rooted culture of discrimination.

13. Ivan Pavlov

Ivan Pavlov may be best known by memorable sound bites, such as «Pavlov's dogs» or the «Pavlovian response.» But his sprawling impact on science can't be reduced to such concise phrases. In his most famous experiments, he would ring a bell every time he gave food to dogs. After repeating this process over and over again, the dogs would eventually begin salivating simply at the sound of the bell. It wasn't long before people realised that humans weren't all that different from dogs. We're all conditioned to respond certain ways — both good and bad — to various stimuli.

Pavlov's insights opened new doors in psychology and behaviourism, and they altered the way people perceive their own behaviours.

14. Albert Einstein

From a physics perspective, Albert Einstein His concepts were so far-reaching that, in some ways, they turned our perception of the very nature of reality inside out. Einstein discovered mass-energy equivalence and also tackled theories of relativity. He won the Nobel Prize in Physics for his discovery of the photoelectric effect, which refers to the ejection of electrons from another material in response to light. His explanation demonstrated that light is made of particles, which then led to the development of the photoelectric cell. This, in turn, resulted in countless inventions, including television, motion pictures and many others. Perhaps more importantly, his research evolved our understanding of physics, including quantum theory. His forward thinking didn't just nudge science and technology forward; it shoved those disciplines into entirely new territory.

15. Marie Curie

Curie, a French-Polish scientist, spent much of her professional life investigating the principles of radioactivity. In 1903, she and her husband Pierre, along with Henri Becquerel, received the Nobel Prize for their physics work on radiation-related phenomena. As if one Nobel wasn't enough, in 1911, she snagged the Nobel in chemistry for her discoveries of radium and polonium. This time, she didn't have to share it with anyone, making her one of very few people to have won prizes in two different fields. In an era when women

were in many ways considered inferior to men, Curie more than proved her worth and left a scientific legacy that continues to affect medicine and technology in untold ways. And her genius was contagious – her daughter, Irene Joliot-Curie, received a Nobel in chemistry in 1935.

16. Hermann Muller

For every technological advance, there are trade-offs and potential side effects. Thanks to his work, people realised the importance of tempering our knowledge with safety and care. Muller won his prize for proving that X-rays cause mutations in the human body. In the mid-1920s, he'd gathered significant evidence that exposing Drosophila flies to X-rays caused genetic mutations that shortened their lifespans. He was certain that the same kind of damage would occur in humans.

Although he'd been trying to publicise his work for around 20 years, it took the World-War II atomic bombings of Japan to underscore the dangers of radiation, X-rays and nuclear fallout. It was then that the Nobel committee finally recognized his research.

The Prizewinners are known:

- A for the unending work with some of the world's most impoverished people
- B as the first multidisciplinary winner
- C for his research on conditioned reflexes
- D for one of the most important medical discoveries ever
- E for pursuing his idea in the face of scorn and cynicism
- F for investigation of all sorts of new genetic advances
- G as a scientist who overhauled not just the entire world but also the entire universe
- H for the discovery of the production of mutations

Module 10 Culture

Part I TEST Частина «ЧИТАННЯ» Reading

Task 1

Read the text below. Match choices (A - H) to (1-5). There are three choices you do not need to use. Write your answers on the separate answer sheet.

Why Her Late Majesty the Queen Was a Unique Cultural Icon

During her 70 years on the throne, the Queen witnessed huge social change, previously unthinkable scientific and technological breakthroughs, and – inevitably – the emergence, decline and re-emergence of countless fashion trends. Some of these she helped spark. Others, like the refined New Look of the 1950s championed by Christian Dior or the bold prints of the 1970s, she wholeheartedly embraced. But, for the most part, she carved out her own, singular visual identity, aided by a host of advisors, stylists and designers. Her style was also faultlessly considered, paying subtle homage to countries, cultures, people and occasions both at home and abroad.

A non-fiction book has set out to provide answers on her life, from ex-Royal governess Marion Crawford's "The Little Princesses", to royal biographers. But the Queen didn't grant interviews, her private papers are sealed, and those close to her were selected above all for their discretion. To mark the Platinum Jubilee, BBC Studios made a 75-minute documentary, narrated by the Queen herself and featuring never-before-seen footage from private home movies shot by the Royal Family. Of course, it is necessary to mention "The Crown's" highly dramatized version of history but even so, there is today no better-known fictional depiction of the Queen.

From fairytale and formal to satirical – the art and photography that depict Her Majesty the Queen reveal some interesting truths. Despite having sat for hundreds of official portraits – and inspiring countless unofficial art works – the Queen remains inscrutable: a pure performance of a role. We think of the art of portraiture as being about capturing some essence or intangible, defining character. Many of the most recognisable images of the Queen are not polite portraits – but rather works that use her image in subversive, witty, or irreverent ways.

She was referred to as a style icon as a result of having a distinct personal style that reflected her location and time. Those in charge of ensuring that the image of Her Late Majesty Queen Elizabeth II is recognized

throughout the world have surely done a good job. Who could be more widely known, through coins, stamps, photographs, radio recordings and television appearances, let alone mugs and tea-towels? Her signature style originated at the start of her reign, and she has steadfastly refused to deviate – so no regrettable '70s prints or ill-considered '80s frills and flounces. The Queen's style was constant and intrinsic to her identity – and although it may have looked effortless, it subtly sent out all the required messages. It said: unwavering authority, tact and diplomacy, and when the occasion demanded it, knock-out, opulent elegance.

5.____

Queen Elizabeth II was a champion of the arts, and during her seven-decade reign, she embraced musicians and bands in the UK and abroad. The Queen was a devotee of classical music throughout her life. As such, during her reign, she paid special attention to the Master of the Queen's Music. The role is held by distinguished members of the classical music community. It's perhaps little surprise, given her ties to Scotland, but Queen Elizabeth II loved the music of pipe bands. And it was also a monarchy touched by the songs of the popcultural 20th century. Ascending to the throne as she did in 1952, Elizabeth inspired affectionate music from the Beatles in the 1960s, followed by more confrontational music from even punk groups from the 1970s onward. Whether they loved royals or mocked them, UK artists couldn't resist invoking the figurehead of a nation.

- A How the Queen became a trendsetter
- B The Queen and modern music
- C Queen Elizabeth v. Counter Culture
- D The imaginary lives of the Queen in literature and the media
- E A politician for 70 years
- F The Queen and the country
- G How the Queen conquered fashion
- H The art that captured a Royal icon

Task 2

Read the text below. For questions (6-10) choose the correct answer (A, B, C or D). Write your answers on the separate answer sheet.

Where Did Music Come From?

What is music? Musical expression can be divided into two groups: vocal music or «song» which consists of complex, learned vocalizations and instrumental music which consists of structured, communicative sound using parts of the body other than the voice and sometimes additional objects.

Although the production of music is considered uniquely human, musical utterances of various degrees of complexity and perfection can be observed in several species in the animal kingdom. Vocalizations of amazingly high complexity and musicality have evolved several times in birds and mammals. Most research has been done on songbirds so far, but also parrots, hummingbirds, whales, seals and possibly other species show vocalizations that can be called musical according to the above definition. Birdsong is commonly regarded as the most complex vocal utterance in the animal kingdom. Some species, such as blackbirds, nightingales and white-rumped shamas, deliver vocal performances of outstanding musical quality that come close to human music in many aspects. Traits of the latter such as an extensive repertoire of melodies, a sense of diatonic intervals, very precise pitch recognition and intonation, ability of transposition, melodic and dynamic variation, imitation, improvisation and composition have been observed in songbirds in various degrees of perfection.

Instrumental sound generation is very rare among animals. Simple sounds that are instinctive and serve functions like signalling danger are usually not regarded as music. Our closest cousins, the African great apes (chimpanzees, bonobos and gorillas), make drumming sounds with their hands – sometimes with both arms – on their own chest, the ground, on objects like tree roots and even on other individuals. Chimpanzees have been found readily adapting other surfaces to drumming including hollow walls. Drumming sequences typically last only a short time, between one and twelve seconds. It is currently unknown whether apes can learn rhythms. It is also unknown whether they can create more complex rhythmic patterns than the simple, steady beat typically observed. There are a few other drumming species, including palm cockatoos, woodpeckers and kangaroo rats. However, using both hands to drum seems to be unique to the great apes and humans.

But why did music develop? This natural question may be asked in another way: what, if any, adaptive functions does music serve? In other words, what advantage did species with musical skills have that allowed them to have more offspring than those that did not? This is a question that interested Darwin. In fact, he was probably the first to ask it, when he said «As neither the enjoyment nor the capacity for producing musical notes are faculties of the least use to man in reference to his daily habits of life, they must be ranked amongst the most mysterious with which he is endowed».

Few stones have been left unturned as to potential functions of music since Darwin posed the question. Many researchers have many different ideas. The following hypotheses about the function of music are among the most common that have been suggested so far. As a null hypothesis, it has been proposed that music has no adaptive function at all. Perhaps it is a mere by product of some other ability that we need, such as language. Another often talked about purpose for music, prominent both in the scientific literature and in the popular press, is in mate choice. Data on birdsong and whale song support this hypothesis. Other ideas include that music might have begun with the use of song by mothers to soothe infants, or as a learning tool in the play of young animals.

The European Union Court of Justice (CJEU)

The Court of Justice of the European Union (CJEU) interprets EU law to make sure it is applied in the same way in all EU countries, and settles legal disputes between national governments and EU institutions. The CJEU gives rulings on cases brought before it. The most common types of cases are: National courts of EU countries are required to ensure EU law is properly applied, but courts in different countries might explain its meaning differently. whether their national legislation complies with that law, it can ask the Court for clarification. This type of case is taken against a national government for failing to obey the EU law. It can be started by the European Commission or another EU country. If the country is found to be at fault, it must put things right at once, or risk a second case being brought, which may result in a fine. If an EU act is believed to violate EU treaties or fundamental rights, the Court can be asked to declare it legally invalid – by an EU government, the Council of the EU, the European Commission or (in some cases) the European Parliament. Private individuals can also ask the Court to cancel an EU act that directly concerns them. UN Marks 20 Years of Convention on Rights of the Child

Ceremonies are taking place around the world to mark the 20th anniversary of a landmark agreement protecting children.

The UN says the Convention on the Rights of the Child has transformed the way children are treated. But it says a billion children in the world still go without food, shelter or healthcare and that millions are facing lives of poverty and abuse.

On the eve of events, a British charity warned that millions of the world's children have no parents or family around them.

The Convention on the Rights of the Child (CRC), signed in 1989, guarantees children the right to life, to education, the right to play and to be protected from abuse. It has the widest international support of any human rights treaty – ratified by 197 countries, with only the US yet to give backing.

The UN says the achievements of the convention have been "remarkable" – 30% more children live beyond the age of five and more than 80% of children now attend primary school. Elizabeth Gibbons, deputy director of the UN children's agency UNICEF, said the impact of the convention on children's lives was clear.

"At any time across the world, in any city, in any media, you'll find a story about children's rights, that's the big change," she said. "Yes, there are many problems not resolved, but now children matter, they matter to society, they matter to the media, and they matter to politicians." But the UN says 24,000 children under the age of five still die every day from preventable disease and illness and that governments must not cut back on provision for children in times of financial hardship.

On the eve of the anniversary, British charity "Everychild" said increasing numbers of children were growing up with no parents or separated from their families. "Everychild" warned that other countries were in danger of following the same path by focusing on building orphanages rather than trying to keep families together.

- 12. The World Health Organization (WHO) acts as a coordinating authority on international public health. It deals with health, sanitation and diseases and sends medical teams to help combat epidemics. Established on 7 April 1948, the agency inherited the mandate and resources of its predecessor, the Health Organization, which had been an agency of the League of Nations. It was established in April 7, 1948 when 26 members of the United Nations ratified its Constitution. April 7 is celebrated as the World Health Day every year. The WHO is governed by 194 Member States through the World Health Assembly. Its headquarters is in Geneva, Switzerland.
- 13. The World Intellectual Property Organization (WIPO) is a specialized agency of the United Nations created in 1967 and headquartered in Geneva, Switzerland. Its purpose is to encourage creative activity and to promote the protection of intellectual property throughout the world. The organization administers several treaties concerning the protection of intellectual property rights.
- 14. The United Nations Educational, Scientific and Cultural Organization (UNESCO) is a specialized agency of the United Nations established in 1946 with its headquarters in Paris, France. Its stated purpose is to contribute to peace and security by promoting international collaboration through education, science, and culture in order to further universal respect for justice, the rule of law, the human rights and fundamental freedoms proclaimed in the UN Charter.

- 15. The Food and Agriculture Organization (FAO) of the United Nations leads international efforts to defeat starvation. Serving both developed and developing countries, FAO acts as a neutral forum where all nations meet as equals to negotiate agreements and debate policy. FAO's mandate is to raise levels of nutrition, improve agricultural productivity, better the life of rural population and contribute to the growth of the world economy. FAO is the largest of UN agencies and its headquarters is in Rome, Italy.
- 16. International Monetary Fund (IMF) is part of the United Nations System and has a formal relationship agreement with the UN, but retains its independence. The IMF provides monetary cooperation and financial stability and acts as a forum for advice, negotiation and assistance on financial issues. It is headquartered in Washington, D. Part I TEST Частина «Читання» Reading

Task 1

Read the text below. Match choices (A - H) to (1-5). There are three choices you do not need to use. Write your answers on the separate answer sheet.

3D Printing: the Future of Food Production?

3D printing is becoming more and more popular. We are now able to print things such as clothing, prosthetic limbs, musical instruments and prototype cars. People and businesses are able to create the things
they need very quickly and easily using 3D printers. But can you imagine printing food?
Some scientists are trying to revolutionise the dining experience by doing this. They hope that having a
3D printer in the kitchen will become as commonplace as the microwave or blender. Scientists say that they are easy to use: you simply have to select a recipe and put the raw food 'inks' into the printer. You can also
modify the instructions to make the food exactly how you want it. This means that it would be very quick and
easy to create tasty and nutritious meals.
3
Using 3D printers to create your meals would also be saving the environment. There would be less need
for traditional growing, transporting and packaging processes as food production would be a lot more efficient.
For example, alternative ingredients such as proteins from algae, beetroot leaves and insects could be converted
into tasty products!
4
Printing food could also help people who suffer from dysphasia (a swallowing disorder). Elderly people
also consider it difficult to chew and swallow. So, the pureed food can make it easier for them and to relieve
pain. One of the ways it does this is through novel designs and textures. The technology employed enables to
create foods that appear enticing to this category of people. They could program the printer to print softer
versions of their favourite foods so that they would not have trouble swallowing them.
5
However, some people think that a future of 3D-printed food would be a disaster. It could take away many

jobs, including those for growing, transporting and packaging food. Imagine a world where there was no need for farming or growing crops and the same tastes and textures could be printed from a raw 'food ink'. Likewise, traditional cafés and restaurants might lose business. Also, there are concerns about the nutritional value of

printed food: is it really possible to get the nutrients we need from food-based inks and gels? What's more, cooking and eating together with family and friends has long been a traditional and enjoyable activity. It is hard to imagine a world where the pastime of cooking is dead and meals can be created at the touch of a button.

(Adapted from:

- A 3D food printing makes everyday life easier.
- B Harmful consequences of printed food production to individuals and society.
- C Increasingly extensive use of 3D printing.
- **p** Traditional food production processes would be more efficient.
- E Environmentally friendly technology.
- F Production of 3D-printed food would have disastrous environmental effects.
- G New possibilities for the groups with special needs.
- H New food production technology would simplify cooking and save time.

Task 2

Read the text below. For questions (6-10) choose the correct answer (A, B, C or D). Write your answers on the separate answer sheet.

Video Games are Good for You!

For years video games have been criticized for making people more antisocial, overweight or depressed. But now researchers are finding that games can actually change us for the better and improve both our body and mind.

Games can help to develop physical skills. Pre-school children who played interactive games have been shown to have improved motor skills, for example they can kick, catch and throw a ball better than children who don't play video games. A study of surgeons who do microsurgery in Boston found that those who played video games were 27 per cent faster and made 37 per cent fewer errors than those who didn't. Vision is also improved, particularly telling the difference between shades of grey. This is useful for driving at night, piloting a plane or reading X-rays.

Games also benefit a variety of brain functions, including decision-making. People who play action-based games make decisions 25 per cent faster than others and are no less accurate, according to one study. It was also found that the best gamers can make choices and act on them up to six times a second, four times faster than most people. In another study by researchers from the University of Rochester in New York, experienced gamers were shown to be able to pay attention to more than six things at once without getting confused, compared with the four that most people can normally keep in mind. Additionally, video games can also reduce gender differences. Scientists have found that women who play games are better able to mentally manipulate 3D objects.

There is also evidence that gaming can help with psychological problems. At the University of Auckland in New Zealand, researchers asked 94 young people diagnosed with depression to play a 3D fantasy game called SPARX and in many cases, the game reduced symptoms of depression more than conventional treatment. Another research team at Oxford University found that playing Tetris shortly after exposure to something very upsetting – in the experiment, a film of traumatic scenes of injury and death was used – can actually prevent people having disturbing flashbacks.

The effects are not always so positive, however. Indiana University researchers carried out brain scans on young men and found evidence that violent games can alter brain function after as little as a week of play, affecting

regions in the brain associated with emotional control and causing more aggressive behaviour in the player. But Daphne Bavelier, one of the most experienced researchers in the field, says that the violent action games that often worry parents most may actually have the strongest beneficial effect on the brain. In the future, we may see many treatments for physical and neurological problems which incorporate the playing of video games.

Task 3

Read the texts below. Match choices (A-H) to (11-16). There are two choices you do not need to use. Write your answers on the separate answer sheet.

Robots: Friend or Foe?

What is the future of artificial intelligence (AI)? Will it be possible for robots to be autonomous? If so, when will that happen and will it be a good thing? We asked four experts what they think.

11. I would say that we are quite a long way off developing the computing power or the algorithms for fully autonomous AI, though I do think it will happen within the next thirty or forty years. We will probably

remain in control of technology and it will help us solve many of the world's problems. However, no one really knows what will happen if machines become more intelligent than humans. They may help us, ignore us or destroy us. I suppose that AI will have a positive influence on our future lives.

- 12. I have to admit that the potential consequences of creating something that can match or surpass human intelligence frighten me. Even now, scientists are teaching computers how to learn on their own. At some point in the near future, their intelligence may well take off and develop at an ever-increasing speed. Human beings evolve biologically very slowly and we would be quickly superseded. In the short term, there is the danger that robots will take over millions of human jobs, creating a large underclass of unemployed people. This could mean large-scale poverty and social unrest. In the long term, machines might decide the world would be better without humans.
- 13. Personally, I think it's fascinating to consider how we'll speed up our evolution as a species by augmenting our bodies. Imagine if you could implant a computer inside our brain! Soon we'll be able to do just that and enhance our mathematical ability, audiovisual perception and our memory, and this idea is only going to become more and more commonplace.
- 14. AI is popping up in the world around us. Recent developments include self-driving cars and drones carrying life-saving equipment to people at sea. Granted, there have been a few teething problems: one woman who was asleep on the floor had her hair eaten by her robot vacuum cleaner and there have been fatal accidents with self-driving cars. But progress always comes at a cost, and for me the advantages far outweigh the disadvantages.
- 15. I'm a member of the Campaign to Stop Killer Robots. Forget the movie image of a terrifying Terminator stamping on human skulls and think of what's happening right now: military machines like drones, gun turrets and sentry robots are already being used to kill with very little human input. The next step will be autonomous 'murderbots', following orders but ultimately deciding who to kill on their own. It seems clear to me that this would be completely unethical and dangerous for humanity. We need to be very cautious indeed about what we ask machines to do.
- 16. There was a time when functional robots were just figments of the imagination but that is not so. Today, technology has progressed to a point that people can enjoy the benefits of robotics in their everyday lives. From robot pets to robot vacuum cleaners and even robotic limbs these inventions are going to change the way people live for sure. This is very promising especially in the military field because pretty soon soldiers will no longer need to be sacrificed in the front lines.

The Oldest Stone Tools

The (33) oldest stone tools have been discovered by researchers working on the shores of
Lake Turkana in Kenya. They are more than 700,000 years older than any stone tools found before. Scientists
think these could have been used for cutting. It means that species which lived even before the earliest humans
from the <i>Homo</i> group (34) more intelligent than scientists previously thought.
After dating the volcanic ash and minerals around the tools, experts have estimated that the tools are three
(35) years old. Until this discovery, the oldest examples of this technology were the tools from
Tanzania. «It's really quite (36) to think what separates the previous oldest site and this site is 700,000
years of time. It's monumental,» said Dr Nick Taylor, from the National Centre of Scientific Research (CNRS)

in France and the University of Leiden in (37)	Netherlands. Dr Ignacio de la Torre, from University
College London's Institute of Archaeology, described t	his as «a game-changing» find. «It's the most important
discovery of the last 50 years,» he told BBC News.

A Life-Changing Invention

When (38) _	Richard O'Shea from C	ounty Cork, Ireland,	won top prize at the BT Young
Scientist & Techno	logy Exhibition 2019, he couldn't co	ontain his excitement.	Richard had designed a stove that
hot using no more	than scraps of wood and that produc	ed almost (39)	smoke. As Richard explained
to the judges: "Eve	ry day more than two billion people	in the world have to	cook their food on stoves that use
wood (40)	_ fuel. And every year, (41)	people in devel	oping countries die from smoke
inhalation from co-	oking on these stoves in poorly vent	ilated homes.	

Richard now wants to get his stove to developing countries as quickly as possible. He is currently working with charities to make this (42) _____. Asked if he ever considered commercialising his design, Richard said: "I just want to get the stove into the hands of the people who need it". Richard's selflessness and enthusiasm make him a true role model for the youth of today!

Module 13 Education

Part 1 Test 1 Частина «Читання» Reading

Task 1

Read the text below. Match choices (A-H) to (1-5). There are three choices you do not need to use. Write your answers on the separate answer sheet.

Different Types of Schools and Education Systems

Boarding school students quickly learn how to perform many domestic chores and complete school

assignments by themselves. They become experts at managing their time, money and resources. They can
focus better on their studies because television, video games, phones and other distractors are limited. These
young scholars usually perform better academically because they live in an environment that is conducive to
learning. Boarding school students live and attend classes with people from a variety of cultures; therefore,
they learn to appreciate and respect the differences in one another and live amicably.
2.
Charter schools have the flexibility to teach students what they might need in the real world, especially
those who are in high school. Charter schools can specifically look at trends and offer more targeted coursework
on topics such as science, computer engineering or environmental studies that wouldn't be offered at a
traditional school. Other more holistic approaches to learning can be implemented as well, such as taking care
of the environment and health-based curriculum to foster a child's whole self and not just traditional types of
learning.
Virtual Schools removed the limitation of time and location, a common challenge in a traditional
classroom. With uplift of these limitations, learners have the freedom to study and finish the coursework
anytime, anywhere. Learners also have the freedom to engage with other on classroom topics, do the assignment,
absorb class content, or take exams at a time or duration that best fits their schedule. Another virtual classroom
advantage that many students find to be very interesting is the sharpening of one's digital skills. While increasing
your skills and knowledge in your area of study, you are the same time sharpening your digital skills on some
of the most sophisticated online learning solutions.

The unique quality of a magnet school is that they usually have a special curricular focus. Magnet schools give students the chance to attend schools that focus on themes or career areas of special interest to the student. Common themes include STEM (Science, Technology, Engineering, and Math), the arts, and vocational or

career paths. Each magnet school offers a unique and challenging curriculum as well as the supports that students need to expand their interests, talents and passions. Magnet schools emphasize an area of study or a method of teaching.

5.

Montessori schools' approach to the education is unique in that it is based on the observation of the child and following his or her abilities and interests. The method is based on the freedom of the child to explore and learn, mostly, through self-direction. The Montessori philosophy recognizes that each child learns in a different way, so every learning style is accommodated. Students proceed through the curriculum in their own time when they are ready. All this learning occurs under the guidance of the teacher who develops an individualized learning plan for every student.

- A Innovative curriculum
- B Studying and living at school
- C Specialized education
- D Homeschooling
- E Individual approach
- F Distant online education
- G Faith schools
- H Language immersion schools

Task 2.

Read the text below. For questions (6-10) choose the correct answer (A, B, C or D). Write your answers on the separate answer sheet.

E. R. A. S. M. U.S.

Today, many teenagers can't wait for the opportunity to pack their bags and head off on an adventure to a foreign country. Fortunately, a highly successful European education and training programme launched in 1987 has so far enabled over two million university students to spend time studying and working abroad. The scheme is named after the Dutch philosopher Desiderius Erasmus of Rotterdam (1466-1536), who travelled and studied in various European cities including Paris and Cambridge. Called 'Erasmus', it is the EU's flagship education programme. Erasmus is both an appropriate and clever name as the letters stand for European Region Action Scheme for the Mobility of University Students.

Its principal aim is to foster understanding and innovation across the continent through student and staff exchange programmes. It not only encourages students to travel abroad and supports them while they are there but it also promotes and funds co-operation between universities and their staff across Europe. Erasmus is one of the most successful programmes ever put in place by the European Community. The vast majority of universities from all the European countries take part in the programme. In all, more than 4,000 third level institutions in 33 countries participate. Current figures show that over 200,000 students and 25,000 staff members make the move each year and this number is constantly growing.

Students who decide to sign up for the scheme either study at a university abroad or do an internship in a foreign company for three months to a year; this time spent away from home is recognised and validated by their own university, provided that certain agreed terms are respected. An important aspect of the programme is that students do not have to pay any fees to the foreign university and there are also a number of grants available for the less financially privileged scholars. Some participants can also benefit from low rent or even free accommodation.

For many young students, the Erasmus experience is their first time living abroad and for some it's their first time away from home. It is undoubtedly an important period in their lives and can have a determining effect on their future. More specifically, it can be especially helpful when you want to get a job. In fact, studies show that time spent abroad not only enriches students' language skills and academic careers but also their intercultural skills, their self-confidence and their self-reliance. Therefore, having an Erasmus exchange on your CV increases a student's chances of employment in the future. What's more, students who have spent time abroad seem to be more open about their future options and more prepared to embrace other cultures. Some respected academics have even suggested that former Erasmus students will be the backbone of a future pan-European identity.

6. The name ERASMUS is a tribute to

- A the Dutch philosopher Desiderius Erasmus of Rotterdam
- B European Region Action Scheme for the Mobility of University Students
- C the EU's flagship education programme
- D an appropriate and clever name

7. What is the main purpose of the Erasmus programme?

- A To promote students' travelling abroad
- B To finance education in European universities
- C To promote and fund co-operation across the continent
- D To encourage understanding and innovation through exchange programmes

8. Who can take part in this programme?

- A Students from any university in the word
- B Students and staff from a European university
- C Students and teachers from any university
- D Staff members of the third level institutions

9. What is NOT provided for by the programme?

- A An education at a university abroad
- B Traineeship in a foreign company for a certain period of time
- C Recognition and confirmation of education by the alma mater
- D Provision of a job in the future

10. What financial help does NOT exist for poorer students?

- A Reduced tuition fees
- B Low rent prices
- C Available grants
- D Free room

Top 6 Universities in the World 2020

The Times Higher Education World University Rankings 2020, released on 11 September 2019, has revealed the world's top universities.

- 11. The University of Oxford is one of the oldest and the most prestigious university in the UK and one of the best known in the world. There are more than 20,000 students at Oxford, with an almost equal number of undergraduates and postgraduates. About 95 per cent of Oxford graduates are either employed or in postgraduate study within six months of completing their studies. The university employs staff from just under 100 different countries and foreign citizens make up about 40 per cent of the student and academic body.
- 12. One of the most striking features of California Institute of Technology is its unusually small size; only around 1,000 undergraduates and 1,250 postgraduates are enrolled there. Caltech aims to foster an interdisciplinary environment in which students learn about and tackle the most challenging and fundamental scientific or technological problems. Among the unusual features of the university are the customary cookie break taken every Thursday by physicists and their students, and the university's status as a distributor of olive oil.
- 13. The University of Cambridge operates a collegiate system, much like the University of Oxford. Almost all of the 18,000 students belong to a college or hall, where they have the option to live, study and sleep on site. There are 31 colleges and 150 academic departments at Cambridge. Every college has unique traditions and all students matriculate in a formal ceremony when arriving at the university. Many famous politicians, cultural figures and scientists spent time in Cambridge, including Isaac Newton and the founder of another of the most prestigious and well-known universities in the whole world.
- 14. Stanford University has generated many start-ups and entrepreneurs and was partly responsible for the development of the surrounding Silicon Valley. Many students go on to achieve great things; 17 Nobel laureates are affiliated with Stanford. The large campus is home to 97 percent of undergraduates and nearly 700 university buildings, alongside museums, gardens and recreational centres. There are just under 7,000 undergraduates and 9,000 graduates at the university, with a 7:1 student-to-staff ratio. Research at Stanford has a \$1.22 billion budget and more than 5,000 of the projects are externally funded.
- 15. The Massachusetts Institute of Technology was founded in the mid-19th century and has always endeavoured to provide financial aid to students on a needs basis. The first female student, Ellen Swallow Richards, was admitted to the chemistry department in 1871. Just two years later, the first international student—from Canada graduated from MIT. Admission to the university is extremely selective; only 8 percent of applicants won a place in the graduating class of 2019. Graduates are employed by top companies, including Google, Amazon and Apple.
- 16. Princeton University is one of the world's foremost research universities with connections to more than 40 Nobel laureates, 17 winners of the National Medal of Science and five recipients of the National Humanities Medal. Princeton has also educated two US presidents, James Madison and Woodrow Wilson, who was also the university's president prior to entering the White House. Other distinguished graduates include Michelle Obama, actors Jimmy Stewart and Brooke Shields, Amazon founder Jeff Bezos and Apollo astronaut Pete Conrad.

Module 14 Work. Jobs. Employment

Part I TEST Частина «Читання» Reading

Task 1

Read the text below. Match choices (A-H) to (1-5). There are three choices you do not need to use. Write your answers on the separate answer sheet.

All Jobs Are Important

Growing up in Kansas, I'd jump on my bike and disappear for the day. My friends and I built ramps and

nterest.

1.

My father was a heating, ventilation and air-conditioning contractor. When I was 7 or 8, I started accompanying him to jobs at schools, offices and homes when school was out for the summer. By age 10, I was working with him. I was the perfect size to crawl under houses to install duct work. I'd run into raccoons, mice and other animals. I learned a lot about life from my father and from listening to the radio commentator Paul Harvey. At 13, I wanted to work in the local pizza parlour. I lied and told the owner I was 15 going on 16 so

he'd hire me. In a small town, it's hard to keep a lie like that going when your boss reads the paper and sees

you in a photo of the baseball team for 13-year-olds.

I planned to attend the University of Kansas at Lawrence to study journalism, so I joined the Army Reserves to help pay for it. Then I found out I got a scholarship. My time with the Reserves was a great experience, especially for a boy from southeastern Kansas who hadn't seen much diversity. It taught me discipline, which people have said is evident in the way I structure my day. I also learned that it's important to accomplish a mission – and to accomplish a team goal while meeting individual members' needs.

In college, I started a business with my roommate, making fliers for companies and posting them on campus. We'd get up at 5 a.m. and cover the bulletin boards in dorms and other buildings.

I was making good money, but owning a company means you can spend a lot of time collecting money owed to you. I didn't want to do that when I graduated. I took a job with a client who owned theme parks and then moved to Six Flags, where I worked from 1992 to 2006; I was president of three locations, in Illinois, Massachusetts and New Jersey.

I decided to try something else, so for the next 18 months I worked for a company that was building the Burj Dubai (now the Burj Khalifa) skyscraper and the Dubai Mall. I was based in Chicago but travelled to

Dubai a few times. Many people were there for financial reasons. In the development projects, I would see the construction workers, mostly from Asia, sleeping on the ground on their breaks. I was amazed at how little they were paid – under \$10 a day – and at how hard they worked. We take so much for granted in this country.

5._____

Americans often think their nation is the centre of the business world, but that is changing. No one in Dubai referred to Wall Street or many of the other things we view as important. The Middle East and other areas have an energy and a gravity that many Americans aren't aware of.

When I was offered my current position, I liked the idea of going from a publicly held company concerned with quarterly earnings to a private one with longer-term plans. This is a family-owned business, and the members understand that the Space Needle is a cultural icon and a landmark that will be here for years. We're making plans for the 50th anniversary of the Space Needle, built for the 1962 World's Fair. My job is also to help this attraction stay current and prepare for the future.

My three children, all under 10, think that my C. E. O. title means that I'm chief elevator operator at the Space Needle. My wife doesn't dissuade them of that belief, and they're not shy about telling the neighbours. In this organisation, no job is more important than any other, so if they view chief elevator operator as one of the most important jobs, I would have to agree with that.

(Adapted from:

- A Eye-opening experience at the construction site
- B Gaining knowledge about life
- C Advantages and disadvantages of the first business
- D Never lie to your boss
- E Shifts in the business world
- F Diversity of Kansas
- G Important skills acquisition
- H Cultural icons and landmarks are protected by law

Task 2

Read the text below. For questions (6-10) choose the correct answer (A, B, C or D). Write your answers on the separate answer sheet.

A Career in the Video Games Industry?

Initially populated by computer scientists and the self-taught, the video game design industry used not to offer many routes into its midst. Often, perhaps unfairly, viewed as just a hobby for young enthusiasts, the video games industry is now being taken seriously. Surprised? Industry experts aren't.

It's not easy though. Video game spin-offs that rapidly follow any new movie require dozens of team members and months of incredible skill, perseverance and intricacies. As with almost every industry, it's tricky to get into – but it is expanding. Jim Donelly, a spokesman for an online games magazine says: 'It's certainly very difficult to make much headway within big companies, or to influence any of the really big mainstream games. But the truth is, the industry needs game designers more than ever. Not just director-level people who orchestrate an entire game, but the lower-level people who design systems and individual set pieces.'

So, how can you get into such a competitive industry? Although many companies prefer people to have a degree in computer science, Jim disagrees. There is only one route: make games. The tools are there. You won't get a job if you haven't made something, and you won't get anywhere independently if you are not

making stuff. Game design is less a job than it is a way of life. Like any creative endeavour it must be done to be real.' Another industry expert, John Field, sees other options. 'There's a lot to be said for "just doing it", but it's really more complicated than **that**. There are lots of people who want to work in games, but few who measure up to the requirements of the industry these days; even fewer who have the creative talent, technical know-how, vision and entrepreneurial ability to really contribute to the ever-changing face of an evolving medium.'

Can you do it on your own? 'Perhaps, but it's pretty tricky,' says John. 'However, a good postgraduate course in games can help, plus provide a year or two of top-level support and guidance. Most games designers start their careers as programmers, or artists, progressing their way up the ladder. They are interested in all forms of entertainment media, plus have a healthy appetite for all areas of the arts and contemporary culture. They may or may not have spent a few years in the working world post-graduation, but have realised that games is going to be their "thing". They are not merely fans, but are fascinated by the future possibilities of games, and are aware of the increasing breadth and diversity of the form. And finally, connections can help. This is often **overlooked**, but in order to get line ahead in games – as in many other areas – you need to network.'

(Adapted from: First Certificate in English with answers, Part 1, 2015)

6. What is the writer's main point about the video games industry in the first paragraph?

- A It is reasonable to consider making a living in this field.
- B Young people's contributions to it should be appreciated.
- C It offers a relatively limited number of career options.
- D Specialists in this area have failed to value its potential.

7. What does Jim tell us about the video games industry?

- A It can be hard to decide which idea will prove successful.
- B Many designers are required to take charge of each large project.
- C It is worth recognising the value of having a long-term strategy.
- D There is room for people with different degrees of responsibility.

8. What does 'that' typed in bold refer to?

- A getting a degree in computer science
- B making games
- C being independent
- D seeing other options

9. What opinion does John express in the third paragraph?

- A It is a mistake to believe that the jobs people do in the industry are easy.
- B Many people lack the qualities needed to do effective work in the industry.
- C The industry could benefit from people who have a strong desire to work in it.
- D The industry is changing too rapidly for people to keep up with it.

10. What does 'overlooked' typed in bold mean?

- A not considered
- B understood
- C not used
- D required

Task 3

Read the texts below. Match choices (A-H) to (11-16). There are two choices you do not need to use. Write your answers on the separate answer sheet.

Best Ways To Find a Job

Job hunting can be easier if you know the right places to look for your next position. There are many ways and places where you can find a job. By finding the right strategies, you can increase your chances of securing new job opportunities.

11. Go to career fairs

Career fairs are a good opportunity to get more information about a company and show that you are interested in working for them. These events connect potential job seekers with representatives from a variety of companies. Most universities often host career fairs on campus. You can benefit more from a career fair if you go prepared with relevant questions. After checking to see which companies are attending, you can select those you would like to work at the most. Then you can meet the representatives of those companies to learn more about open positions. These fairs are also a great opportunity to network and connect with people.

12. Use career websites

There are many online job boards and career websites that regularly post new listings. A career site is a way to show off employer's brand, communicate company values, tell employee stories, and post open jobs. Career sites are used in recruitment marketing strategies to build employer brand and engage candidates. Most of them are free to access and only require you to sign up and create a profile. On some of these websites, you can also opt-in to receive newsletter updates about new job listings in a specific sector or role. To get the most out of these platforms, you need to check them regularly and open the newsletters to see new opportunities.

13. Nominate yourself

If you already have a job, sometimes there may be openings for promotions or positions in different areas inside your own company. This is why you want to always work hard and have a great image amongst your colleagues. Apart from the personal gratification you receive by excelling, it can also cause you to be favoured by your employer. Nominating yourself for an opportunity is a good way to switch jobs internally. By keeping up to date with company news, you can learn about positions for which you can apply.

14. Apply through recruitment agencies

Recruitment agencies serve as a liaison between job seekers and companies. Recruitment agencies are external firms that find suitable candidates for employers. They are tasked by employers to find candidates for vacant positions within their organisations to save time and money and access the extended candidate net that a direct advert and company network cannot reach. They can be expected to always be up to date with companies that are hiring and the roles they are looking to fill. You can approach such agencies to pitch you as a suitable candidate to these companies. There are different recruitment agencies you can work with when looking for a job. You want to do your research to find the best one for your field.

15. Volunteer

Volunteering is a good way to keep yourself occupied while you are out of work. It is also a good opportunity to learn new skills and gain experience in an area you would like to work in so you can add to your

CV. If you are diligent and hard-working people you are working with will notice it and support you as a possible candidate for a job. Volunteering can also make you feel fulfilled and give you a sense of purpose.

16. Start your own business

You can start your own business as a way to keep yourself busy until your application is successful or be your own boss. It is also possible that you have considered being a full-time entrepreneur because of a market gap you cannot ignore. Either way, starting your own business is a good idea and looks great on a CV. If you are wondering how to start, you may want to take a moment to discover which market you would like to explore. Then you can begin to do your research to find out how much it would cost you and if it is a viable business option.

Late	Later	latest (time)
Late	Later	last (position)
little	Less	Least
much	More	Most
many	More	Most
Near	Nearer	Nearest
Old	Older	Oldest
Old	Elder	Eldest

NB

Far has two comparative and superlative forms: farther/farthest and further/furthest. We use them to talk about distances:

Chris swam to the farther/further end of the lake.

Further can also mean 'more' or 'extra'. We cannot use farther in the same way:

For further information, please write to the above address. (= more information)

Old has two comparative and superlative forms: *older/oldest* and *elder/eldest*. We use *elder/eldest* for family members:

David's elder son is studying law at Harvard.

We cannot use than with elder.

He is elder than me. He is older than me.

DETERMINERS

less (than), the least We can use less + adjective (+ than) and the least + adjective (+ of/in/etc.) to make negative comparisons:	[18] 1 - 12 - 12 - 12 - 12 - 12 - 12 - 12 -
far/much/a lot + comparative We use far, much or a lot before a comparative adjective for emphasis. There is little difference in meaning, although far is often stronger:	

the + comparative, the + comparative	
The structure <i>the</i> + comparative, <i>the</i> + comparative can be used to show that things change or vary	
together:	1

COMPARATIVE STRUCTURES

as as, not as/so as To say that two things, people, places, etc. are the same or equal in some way, we use as + adjective/adverb + as:	
To say that two things, people, places, etc. are different, we use not as/so as:	Mary is as tall as Jane but she isn't as tall as Andrew. The café is not as crowded as it was earlier.
	She worked so hard as Pete. X
We cannot use so as in affirmative sentences:	She worked as hard as Pete.
	She didn't work so hard as Pete.
	She didn't work as hard as Pete.
	She's not as tall (as him/as he is).
We can omit the second part of the comparison if it is	John didn't do as well as Helen in the exam.
clear who or what we are talking about:	John didn't do as well (as her/as she did).
Note: we use as as, not as so:	Tea isn't as strong so coffee. X
	Tea isn't as strong as coffee.
as many/much/little/few as We also use as many/much/little/few as in comparisons. Notice that we do not use a: We cannot use more, less or several in the same way.	Bill doesn't have as much money as Anne. If she had as little money as he did, she would think differently. Amy doesn't have as many meals as Fred. If Amy had as few meals as Fred, she would be thinner.
the same (as)	ininner.
Same is followed by the preposition as. We always use the before same:	Their car is the same (as ours). Peter is the same age (as George).
We can use exactly before the same for emphasis:	Their car is exactly the same (as ours). Peter is exactly the same age (as George).
like and as	
Note the difference between like and as:	like + noun
We use like to say that things, people, places, etc. are	He runs like the wind.
similar:	Like the Greeks, Italians use olive oil a lot. like + pronoun
	My brother is just like me.
	Like you, I'm not very keen on football. as + noun
We use as to say what job, duty, use or appearance	
somebody or something has:	As your teacher, I advise you to work harder.

PRONOUNS

Much / Many / Little / Few		
We use much and little with uncountable nouns:	much time / much luck / little energy / little money	
We use many and few with plural nouns:	many friends / many people / few cars / few countries	
We use <i>much/many</i> especially in negative sentences and questions. A <i>lot (of)</i> is also possible:	We didn't spend much money. (or We didn't spend a lot of money.) Do you know many people? (or Do you know a lot of people?) I don't go out much. (or I don't go out a lot.)	

In positive sentences a <i>lot (of)</i> is more usual. <i>Much</i> is unusual in positive sentences in spoken English:	We spent a lot of money. (not 'We spent much money') He goes out a lot. (not 'He goes out much')
You can use <i>many</i> in positive sentences, but <i>a lot (of)</i> is more usual in spoken English:	A lot of people (or many people) drive too fast.
But note that we use <i>too much</i> and <i>so much</i> in positive sentences:	We spent too much money.
	We must be quick. There is little time. (= not much, not enough time) He isn't popular. He has few friends. (= not many, not enough friends)
You can say very little and very few:	There is very little time. He has very few friends.
Some / Any	The Francisco Control of the Control
Some	
A little, a few or small number or amount. We usually use <i>some</i> in positive sentences for countable and uncountable nouns. Sometimes we use <i>some</i> in a question, when we expect a positive YES answer.	I usually drink some wine with my meal.
Any One, small or all. It is used with negative sentences. When asking questions and when a sentence is grammatically positive, but the meaning of the sentence is negative.	Do you have any ice cream left for me? My brother never does any chores. We use any for both countable and uncountable nouns. Do you have any cheese? He doesn't have any friends in Paris.
Both / Both of / Neither / Neither of / Either / Eithe	er of
We use both/either/either for two things. You can use these words with a noun (both books, neither book etc.). For example, you are talking about going out to eat this evening. There are two restaurants where you can go. You say:	
(etc.).	Neither of the restaurants we went to was (or were-inf.) expensive. I haven't been to either of those restaurants. (= I
You can use both of / neither of / either of + us/you/them:	parents (talking to two people) Can either of you speak Spanish? I asked two people the way to the station but neither
You must say 'both of before us/you/them (of is	of them knew. Both of us were very tired, (not 'Both us were')
necessary): After neither of a singular (formal English) or a plural verb (informal English) is possible:	Neither of the children wants (or want) to go to bed.
You can also use both / neither / either alone:	I couldn't decide which of the two shirts to buy. I liked both. (or I liked both of them.) 'Is your friend British or American?' 'Neither. She's Australian.' 'Do you want tea or coffee?' 'Either. I don't mind.'

Both and:	Both Ann and Tom were late.
Coll - \$2007	I was both tired and hungry when I arrived home.
Neither nor:	Neither Liz nor Robin came to the party.
	She said she would contact me but she neither wrote
	nor phoned.
Either or:	I'm not sure where he's from. He's either Spanish or
	Italian.
	Either you apologise or I'll never speak to you again.
	Either James or I am to do it.
No / None / Not a / Not any	
No and None:	
We use $no + noun$.	She had no shoes on.
	No information was given about how the study was
	conducted.
	There will be no busses until tomorrow.
None is used without any noun after it.	Have we got any more sugar? There's none in the
	kitchen.
	How many cats have you got? - None.
No or none (of) is used instead of not a or not any to	No force was needed to make them move. (not any
emphasize the negative idea in a sentence.	force was needed).
No or none of is used but not any can't be used in	None of the children was awake. (not any of the
initial position in a clause or sentence.	children).
Note: No and none of are often preferred instead of	cimareny.
not any in formal written English.	
Not a:	
Not a is used in a formal or literary style. Not a is also	Not a word would she utter about the robbery.
used in initial position in a clause or sentence.	Not a sound came from the classroom.
No:	1100 a sound came j. on the came
After <i>no</i> , a singular noun is used in situations where	No answer (or answers) could be found.
we would expect one of something, a plural noun	We want to go to the island but there's no hoat (or no
where we would expect more than one.	boats) to take us.
Note: Sometimes either a singular or plural with little	
difference in meaning can be used.	
None of:	
None of can be used with a plural noun and the verb	None of the children were awake. (or was
can be either singular or plural, although the singular	
form is usually more formal.	has arrived yet).
Note: However, when none is used with an	
uncountable noun, the verb must be singular.	None of the money has been transferred to Cuba.
No amount of:	princes and a second se
If we want to give emphasis to no or none of, we can	She was so seriously ill that no amount of expensive
use phrases like no amount of with uncountable nouns	
and not one (of) with singular countable nouns.	It was clear that no amount of negotiation would
	bring the employers and workers closer together.
Possessives	THE WAY
Basic use	6 h
We use Possessives to express a relation, often the	My diary is the diary that belongs to me.
fact that someone has something or that something	
belongs to someone.	
Compare the possessive form of a noun.	Luke's diary
	our neighbour's birthday

Possessive determiners (sometimes called 'possessive adjectives') come before a noun. Note: A possessive determiner can come after all, both or half, or after a quantifier + of.	our neighbour her birthday NOT the diary of me and NOT the my diary
We leave out the noun if it is clear from the context what we mean. When we do this, we use a pronoun. We say <i>mine</i> instead of <i>my diary</i> .	NOT I haven't got my. and NOT I haven't got the mine. That isn't Harriet's coat. Hers is blue. Whose is this pen? – Yours, isn't it?
A possessive pronoun is often a complement. Note: We can use the possessive form of a noun on its own.	
But we do not use an apostrophe with a possessive pronoun. NOT your's	We can use yours at the end of a letter, e.g. Yours sincerely/faithfully.

	Determiners		Pronouns	
	Singular	Plural	Singular	Plural
First person	my pen	our house	Mine	ours
Second person	your number	your coats	Yours	yours
Third person	his father her decision its colour	their attitude	his hers	theirs

More / Most / the Most / Most of	
<i>Most</i> = the majority of / the greatest amount of	
Most is used in front of a noun if you are talking in general about a large, general group with no determiner.	He hates most vegetables, including green beans! Most people speak two languages in Northern Europe.
Most = very	
Most is used mainly with adjectives of two or more syllables.	You are most generous. It is most annoying.
Most of = the majority of Most of is used in front of a determiner (the, my, this/ these, that/those) or a pronoun (us, you, them) if you are talking about a smaller, more specific group. Most of is also used in front of a proper noun or if you are talking about a specific country or region.	Most of these explanations are not satisfactory! Most of my students learn their lessons regularly!
More = a greater or additional amount or degree	
More is used when we want to speak about a greater or additional amount, degree or number. More is used to form the comparative form of adjectives or adverbs of not more than 2 syllables.	I think you should have brought more chairs. We need more food. You'll have to be more careful next time.
The most = the greatest degree	

The most ... is used to form the superlative form of adjectives or adverbs of more than 2 syllables.

Another form of superlative = 'most + adjective ...' (= really very ...), with NO article.

He is the most intelligent member of the family!

This lecture was most interesting really!

Verb + to infinitive	Active They want to clean the office.
verb + noun + to be + past participle	Passive They want the office to be cleaned.
- ing (gerund)	Active He hates people keeping him waiting.
verb + being + past participle	Passive He hates being kept waiting.

The passive is used:

Use	Example	
When the person or people who do the action (the agent) are: – unknown (to avoid using a general subject, e.g. they, people, someone)	The car was stolen at approximately 1.30 p.m. (More natural than Someone stole the car.)	
 obvious from the context 	A man was arrested in town yesterday for stealing a car.	
– unimportant	The suspect will be interviewed.	
To emphasise new information (which	The suspect was interviewed by Detective Smith.	
appears at the end of the sentence)	This type of weapon was developed by the Americans.	
When the action itself is more important than the agent (as in news headlines, newspaper articles, formal notices, advertisements, instructions, processes, etc.)	Several houses were destroyed in the earthquake.	
To avoid starting clauses with long expressions	We were surprised by the number of people trying to leave the city for the long weekend.	
	More natural than The number of people trying to leave the city for the long weekend surprised us.	

To be impersonal and avoid saying who performs or is responsible for an action	Oil and gas are found beneath the ground or sea. I've been told not to say anything. A page was torn out of my book.
To use a formal style (official announcements, scientific texts, etc.)	All passengers are required to present their ticket to the inspector.

NB

NOT normally used in the passive:

- intransitive verbs (without objects), such as appear, arrive, die, grow, happen, laugh, sleep, walk, work, stand up, speak, etc., and some common transitive verbs, in particular many state verbs, such as consist, deserve, look, mind, realize, suit, have, exist, seem, fit, suit, resemble, let, lack, etc. are (be allowed to is used instead of let);
- present perfect continuous, past perfect continuous, future continuous and future perfect continuous tenses;

Verbs hear, make, see + to infinitive, e.g. I was made to clean my room by Mum.

To say who performed the action, use 'by' + the agent.

To say what the agent used, use 'with' + instrument / material / ingredient .

REPORTING WITH PASSIVES / IMPERSONAL PASSIVE CONSTRUCTIONS

We use special forms of the passive to report what people say, think, etc., or what is said by an unspecified

group of people.

Form	Common verbs	Example
noun + passive verb + to-infinitive/perfect infinitive (personal construction)	agree, assume, believe, claim, consider, estimate, expect, feel,	Tourism is expected to become a major part of the country's economy.
There + passive verb + to be/to have been (impersonal construction)	find, guarantee, know, mean, presume, regard, report, say, suppose, think, understand	There are reported to have been a record number of accidents on the roads this year.
It + passive verb + that clause (impersonal construction)	accept, agree, argue, assume, believe, calculate, claim, consider, estimate, expect, feel, know, presume, report, say, suggest, suppose, think, understand	It is thought that the new railway will provide employment opportunities for local people.

THE CAUSATIVE

HAVE / GET something DONE

noun + have/get in the correct form + noun (obj	ect/thing) + past participle + by/with + noun
Actions we arrange for other people to do for us (= we don't have to do it ourselves, somebody else does it for us)	

Can be used instead of the passive to refer to	I had my wallet stolen last night. = My wallet was stolen
unpleasant situation which hasn't been arranged	last night.
(e.g. accidents, misfortunes, and other negative	He had his house broken into last week.
and not intended things)	We had our herb garden vandalised while we were away.
NB	
in this case we USE have but NOT get	

HAVE somebody + DO something / GET somebody + TO DO/ something

noun + have + noun (object/per noun + get + noun (object/person) + t	
Use this pattern to refer to the person we arrange (i.e. make, persuade or cause) to do something for us	I'll have my assistant bring / get my assistant to bring you a copy. Why don't you get the chef to prepare / have the chef prepare you a vegetarian meal?
NB	
get + object (somebody) + full infinitive (to do something) = to persuade sb else to do sth	Did you get Alex to drive you all the way to London?
	Mum made us do all our homework before going to the
make + object (somebody) + bare infinitive (do something) = to insist that sb do sth	
Form: noun + get + past participle	an an agust an a
Use this pattern to mean "become"	She got dressed and went downstairs.

I was seen hiding the surprise birthday present. You had better take notes during the lecture. after had better and would rather: When I was younger, I used to fight with my brother. in the expressions used to and be supposed to: The -ing form is used: Eating chocolate isn't good for your teeth. as a noun: after certain verbs: admit, appreciate, avoid, continue, Leo suggested walking in the park. deny, fancy, go (for activities), imagine, mind, miss, quit, save, suggest, practise, consider, prevent:

after love, like, enjoy, prefer, dislike, hate to express Christine loves making crafts. general preference: BUT for a specific preference (would like/would prefer/ She'd love to go to a peaceful holiday resort. would love) we use a to infinitive: There's no point in complaining when we have no after expressions such as be busy, it's no use, It's (no) other choice. good, It's (not) worth, what's the use of, can't help, there's no point in, can't stand, have difficulty (in), have trouble, etc: Joseph spends all his free time drawing. after spend, waste or lose (time, money, etc): Harry is looking forward to spending the weekend after the preposition to with verbs and expressions such in the mountains. as look forward to, be/get used to, in addition to, object to, prefer (doing sth to sth else): She is interested in acting at the theatre. after other prepositions: I watched them rehearsing for the play. after the verbs hear, listen to, notice, see, watch and feel (I only watched part of the rehearsal.) to describe an incomplete action: I watched them rehearse for the play. BUT we use the infinitive without to with hear, listen (I watched the whole rehearsal.) to, notice, see, watch and feel to describe the complete action: They helped me (to) write the invitations. REMEMBER! Help can be followed by either the to infinitive or the infinitive without to. I would prefer to stay at home and revise for my If two to infinitives are linked by andor or, the to of the test. second infinitive can be omitted. I used a fountain pen to write my article with. If a verb is followed by a preposition, the preposition will appear at the end of the sentence. I've never eaten sushi, but I'd love to. We can use to in order to avoid repeating a verb clause. The subject of the infinitive:

- is omitted when it is the same as the subject of the main verb. They want to go to New Zealand. (The subject of the main verb (want) and the infinitive (go) is the same (they).)
- is not omitted when it is different from the subject of the main verb. The subject of the infinitive comes before the infinitive and can be an object pronoun (me, you, them, etc.), a name (Cathy) or a noun (the man). He wants her to clean up the mess. (The subject of the main verb (want) is he, whereas the subject of the infinitive clean up) is her.)

The subject of the -ing form can be an object pronoun, a possessive adjective, a name or a possessive case when it is different from the subject of the main verb.

I remember him/his/Sam/Sam's graduating from medical school.

Too/Enough		

Too has a negative meaning and shows that something Enough has a positive meaning and shows that is more than enough or necessary. It appears before there is as much of something as is wanted or adjectives or adverbs and is followed by a full infinitive. This exercise is too difficult for the students to solve. (NOT: ... to solve it.)

needed. It appears before nouns but after adjectives or adverbs and is followed by a full infinitive. There are enough leaflets to give out to everyone. She is experienced enough to lead the group.

Remember!

Enough also appears in negative sentences to show that more of something is wanted or needed.

I don't have enough apples to make an apple pie.

(= I need more apples.)

It is never used before an adjective. Instead we use quite or fairly.

She's quite active.

Participles

• Present participles (verb + -ing) describe what someone or something is.

It was an exciting story.

(How was the story? Exciting.)

Past participles describe how somebody feels.

The children are excited about our trip to Disneyland.

(How do they feel? Excited.)

Remember!

The participle and the rest of the sentence must refer to the same subject.

While playing a game on my computer. I heard a loud knock at the door.

(NOT: While playing a game on my computer, a loud knock was heard at the door.)

Subjective Infinitive Constructions

The Subjective Infinitive Construction (traditionally called the Nominative-with-the-Infinitive Construction) is a construction in which the infinitive is in predicate relation to a noun in the common case or a pronoun in the nominative case.

The Subjective Infinitive Construction is used with the following groups of verbs in the Passive Voice: With verbs denoting sense perception: to see, to hear, to feel, etc.	They were seen to leave the house early.
With verbs denoting mental activity: to think, to consider, to know, to expect, to believe, to suppose.	They are known to be good friends.
With the verb to make.	I was made to drink some hot milk.
With verbs to say and to report.	The pilot is reported to have started on his flight early in the morning.
The Subjective Infinitive Construction is also used with the word groups to be likely, to be sure, and to be	I think he is very likely to stay a week or two. He is sure to marry her.
certain. The Subjective Infinitive Construction is used with the following pairs of synonyms: to seem and to appear; to happen and to chance, to prove and to turn out.	The weather appears to be changing.

REPORTED SPEECH

Reported Speech: Tense and Modal Changes

We use reported speech when we want to say what someone else said, e.g. Jason said he was going to buy a new pair of trainers.

If the reporting verb is in the past (e.g. said), we usually have to change the tense of what the person actually said.

Direct Speech	Reported Speech	Example
present simple	past simple	'I need a credit card, 'said Tim — Tim said he needed a credit card.
present continuous	past continuous	'I'm taking Lizzie shopping, 'said Tim. – Tim said he was taking Lizzie shopping.
present perfect simple	past perfect simple	'I've bought Tom a present,' said Tim. – Tim said he'd bought Tom a present.
present perfect continuous	past perfect continuous	'I've been thinking about buying a car,' said Tim. — Tim said he'd been thinking about buying a car.
past simple	past perfect simple	I spent six euros, 'said Tim. – Tim said he'd spent six euros.
past continuous	past perfect continuous	I was hoping to find a new top, 'said Tim. – Tim said he'd been hoping to find a new top.
past perfect simple	past perfect simple (no tense change)	'I'd looked everywhere for my credit card before I found it, 'said Tim. – Tim said he'd looked everywhere for his credit card before he found it.
past perfect continuous	past perfect continuous (no tense change)	I'd been looking for that book for weeks before I found it,' said Tim. — Tim said he'd been looking for that book for weeks before he found it.
am/is/are going to	was/were going to	'I'm going to go shopping,' said Tim. — Tim said he was going to go shopping.
Will	Would	'I'll need a credit card, 'said Tim. – Tim said he would need a credit card.
Can	Could	I can take Lizzie shopping,' said Tim. – Tim said he could take Lizzie shopping.
must /have to	had to	I must go to the supermarket,' said Tim. – Tim said he had to go to the supermarket.
May	Might	I may go shopping later,' said Tim. — Tim said he might go shopping later.

NB We do not need to make any changes to the verb tense or modal when we are reporting a specific fact or when something is still true.

'Most banks charge interest,' said Tim - Tim said most banks charge interest.

Reported Speech: Pronoun and Determiner Changes

Direct Speech	Reported Speech	Example
My	his/her	'I've lost my credit card, ' said Tim. – Tim said he had lost his credit card.
this/that + noun	the/that	I love this sweater, 'said Tim. – Tim said he loved the / that sweater.

Suffixes: Spelling

Sumac	s. Spening
Often, the suffix causes a spelling change to the	
original word. The -e ending of complicate and	
create disappears when the -ion suffix is added.	
Other examples of spelling changes include:	
beauty, duty + -ful	→ beautiful, dutiful (-y changes to i)
heavy, ready + -ness	→ heaviness, readiness (-y changes to i)
able, possible + -ity	→ ability, possibility (-le changes to il)
permit, omit + -ion	→ permission, omission (-t changes to ss)

Conversion

Conversion involves the change of a word from one word class to another. For example, the verbs to email and to microwave are formed from the nouns email and microwave

Can you text her? (verb from noun text, meaning to send a text-message)

They are always jetting somewhere. (verb from noun jet)

in a good learner's dictionary.

If you're not careful, some downloads can damage your computer. (noun from verb download)
OK, so the meeting's on Tuesday. That's a definite. (noun from adjective)
It's a very big if and I'm not at all sure we can afford it. (noun from conjunction, meaning 'it's not at all certain')
All companies have their ups and downs. (nouns from prepositions)
We also use conversion when we change a proper noun into a common noun:
Has anybody seen my Dickens? (copy of a book by Dickens)
Compounding

When we use **compounding**, we link together two or more bases to create a new word. Normally, the first item identifies a key feature of the second word. **Compounds** are found in all word classes. The most common types of compounds are:

Nouns: car park, rock band

Adjectives: heartbreaking, sugar-free, airsick

Verbs: oven-bake, baby-sit, chain-smoke

Adverbs: good-naturedly, nevertheless

It is sometimes difficult to know where to put hyphens in words that are compound. It is also difficult to know whether to separate words (e.g. post box) or to join the words (e.g. postbox). In such cases, it is best to check
